XIV. The Earth Charter
The drafting of the Earth Charter was completed and the Charter was formally launched by the Earth Charter Commission in 2000. Since then, the global network of social activists, teachers, entrepreneurs, religious leaders, international law experts, and leaders in government, who are using, implementing and promoting the Earth Charter, has steadily grown. The Earth Charter International Council and Secretariat, which form Earth Charter International (ECI), endeavor to provide long range strategic direction and resource materials for the expanding Earth Charter Initiative.

This EC Initiative Handbook has been prepared by the ECI Council and Secretariat as a general guide for advisors, affiliates, partners, and all those who are working with the Earth Charter in many different nations and cultures around the world. The Handbook provides basic information on the origin, nature and purpose of the Earth Charter, the structure and mission of the Earth Charter Initiative, and the organization, goals and policies of ECI. Readers are encouraged to use the Table of Contents to identify those sections of the Handbook that may be of most interest. In addition to the Handbook, the Earth Charter International website contains much more information on how to get involved, on current Earth Charter activities and events, and on relevant reading materials.

The world is undergoing profound environmental, social and economic changes and faces an uncertain future. Commitment to a shared ethical framework that provides a clear sense of direction is essential if the people of the world are to come together in the midst of their diversity and build a global society that is just, sustainable, and peaceful. The Earth Charter is an expression of the widespread aspiration in the emerging global civil society for a shared vision of a better world. The ECI Council and Secretariat deeply appreciate the support given to the Earth Charter Initiative by individuals, organizations, and governments and hope this Handbook will prove to be a valuable resource.

Steven C. Rockefeller
Co-chair, ECI Council
Member, Earth Charter Commission

Mirian Vilela
Executive Director, ECI Secretariat
Member, ECI Council
The Earth Charter is a declaration of fundamental ethical principles for building a just, sustainable and peaceful global society in the 21st century. It seeks to inspire in all people a new sense of global interdependence and shared responsibility for the well-being of the whole human family, the greater community of life, and future generations. It is a vision of hope and a call to action.

The Earth Charter is centrally concerned with the transition to sustainable ways of living and sustainable human development. Ecological integrity is one major theme. However, the Earth Charter recognizes that the goals of ecological protection, the eradication of poverty, equitable economic development, respect for human rights, democracy, and peace are interdependent and indivisible. It provides, therefore, a new, inclusive, integrated ethical framework to guide the transition to a sustainable future.

The Earth Charter is a product of a decade-long, worldwide, cross cultural dialogue on common goals and shared values. The Earth Charter project began as a United Nations initiative, but it was carried forward and completed by a global civil society initiative. The Earth Charter was finalized and then launched as a people’s charter in 2000 by the Earth Charter Commission, an independent international entity.

The drafting of the Earth Charter involved the most inclusive and participatory process ever associated with the creation of an international declaration. This process is the primary source of its legitimacy as a guiding ethical framework. The legitimacy of the document has been further enhanced by its endorsement by over 4,800 organizations, including many governments and international organizations.

In light of this legitimacy, an increasing number of international lawyers recognize that the Earth Charter is acquiring the status of a soft law document. Soft law documents like the Universal Declaration of Human Rights are considered to be morally, but not legally, binding on state governments that agree to endorse and adopt them, and they often form the basis for the development of hard law.

At a time when major changes in how we think and live are urgently needed, the Earth Charter challenges us to examine our values and to choose a better way. At a time when education for sustainable development has become essential, the Earth Charter provides a very valuable educational instrument. At a time when international partnerships are increasingly necessary, the Earth Charter encourages us to search for common ground in the midst of our diversity and to embrace a global ethic that is shared by an ever-growing number of people throughout the world.

Note: For more information on the origins of the Earth Charter see “A Short History of the Earth Charter Initiative” in Section IX.
II. The Structure and Mission of the Earth Charter Initiative

Earth Charter Initiative

“The Earth Charter Initiative” is an extraordinarily diverse, global network of people, organizations, and institutions that participate in promoting and implementing the values and principles of the Earth Charter.

The Initiative is a broad-based, voluntary, civil society effort. Participants include leading international institutions, national governments and their agencies, university associations, non-government organizations and community-based groups, city governments, faith groups, schools and businesses – as well as thousands of individuals.

Many organizations have formally endorsed the Earth Charter and are using it or promoting its vision. Many others are using or promoting the Charter without enacting an endorsement.

Earth Charter Commission

The Earth Charter Commission, which was formed in early 1997 as an independent, international body by the Earth Council and Green Cross International, oversaw the Earth Charter consultation and drafting process, approved the final text of the Earth Charter, and launched the Earth Charter in 2000. The Commission retains authority over the text of the Earth Charter, and its members advise Earth Charter International and serve as Earth Charter Ambassadors. However, the Commission is no longer involved in oversight of the Earth Charter Initiative. That responsibility has been given to the Earth Charter International Council.

Earth Charter International (ECI)

Earth Charter International consists of the ECI Council and Secretariat. ECI exists to advance the Earth Charter Initiative Mission and Vision. It endeavors to promote the dissemination, adoption, use and implementation of the Earth Charter and to support the growth and development of the Earth Charter Initiative. ECI was created in 2006 as part of a major reorganization and expansion of Earth Charter activities.

It is important to remember that, although the Earth Charter International Council provides leadership and guidance to the broader Initiative, it does not directly govern or control the Earth Charter Initiative as a whole. The Initiative is not governed in any formal sense. The Council is responsible only for the governance of Earth Charter International.
Earth Charter Initiative Mission Statement
adopted by the ECI Council

The mission of the Earth Charter Initiative is to promote the transition to sustainable ways of living and a global society founded on a shared ethical framework that includes respect and care for the community of life, ecological integrity, universal human rights, respect for diversity, economic justice, democracy, and a culture of peace.

Earth Charter Initiative Vision Statement
adopted by the ECI Council

We envision individuals, organizations, businesses, governments, and multilateral institutions throughout the world, including the United Nations General Assembly and UN agencies, acknowledging the Earth Charter, embracing its values and principles, and working collaboratively to build just, sustainable, and peaceful societies.

Earth Charter International Organizational Vision adopted by the ECI Council

Over the next five years, we envision creating high quality communications and education resources that reach millions of people, promoting a systematic way of understanding the fundamental challenges of our time, catalyzing thousands of initiatives in support of the Earth Charter’s objectives, and inspiring hope.

Over the next five years, we envision bringing the Earth Charter and its ethical values and principles into strategically chosen events, processes, and initiatives involving civil society, business, youth and government.

We envision accomplishing these goals as a small, efficient organization that works in partnership with individuals, affiliates, task forces, other organizations, and governments.

The following are the goals and strategic objectives adopted by Earth Charter International.

Goals:

1. To raise awareness worldwide of the Earth Charter and to promote understanding of its inclusive ethical vision.

3. To promote the use of the Earth Charter as an ethical guide and the implementation of its principles by civil society, business, and government.

4. To encourage and support the educational use of the Earth Charter in schools, universities, religious communities, local communities, and many other settings.
5. To promote recognition and use of the Earth Charter as a soft law document.

**Strategic Objectives:**

- To promote development of a global network of Earth Charter supporters and activists with the collaboration of advisors, affiliates, partner organizations, and task forces.

- To create and disseminate high quality communications and educational materials to different target groups that will reach millions of people.

- To translate key Earth Charter materials in all major languages of the world.

- To set up Earth Charter websites in all countries in partnership with key individuals and organizations.

- To promote the Earth Charter vision in key local, national and international events and engage individuals and organizations in applying it in their areas of activity.

- To position the Earth Charter in relation to important international initiatives and processes so that its ethical framework can be used as a guide in efforts to address urgent challenges such as climate change, biodiversity loss, the Millennium Development Goals, food security, and conflict resolution.

- To undertake training programmes to facilitate the uptake and application of the Earth Charter in different sectors.

- To develop the guidance and instruments to help organizations, businesses, and local communities use the Earth Charter to assess progress toward sustainable development.

**Roles of Major Actors**

1. **Earth Charter Commission**

   The Commission is the custodian of the Earth Charter text. Commission members advise and support the Earth Charter Initiative and act as Ambassadors for the Earth Charter.

   Following the launch of the Earth Charter in 2000, the Commission turned over responsibility for the oversight of the Earth Charter Initiative and fundraising to a Steering Committee. In 2006 the Steering Committee was replaced by the ECI Council.

2. **ECI Council**

   The ECI Council oversees the work of the Earth Charter International Secretariat. It sets major goals, policies, and strategies for ECI, and provides guidance and leadership to the broader Initiative. The ECI Council is not a legally incorporated entity. The Council elects its own members in consultation with members of the global network of Earth Charter supporters.
3. ECI Secretariat

The ECI Secretariat, which is based at the United Nations-mandated University for Peace in Costa Rica, endeavours to promote the mission, vision, strategies and policies adopted by the ECI Council. It supports the work of the Council, assists with strategic planning and coordinates many Earth Charter activities. The Secretariat guides and liaises with efforts to bring the Earth Charter to the fields of education, youth, business and religion, manages communications with the larger Earth Charter network, and promotes the use of the Earth Charter as an international soft law document.

4. Task Forces

Task Forces have been designed to operate as volunteer networks that will lead to independent initiatives. Task Forces will be focused on developing a network and promoting activities in one of the following areas: Business, Education, the Media, Religion, the United Nations and Youth. The ECI Council executive committee will approve appointment of the leadership team for each Task Force. Task Forces will involve council members, individuals and organization partners, affiliates or advisors. The ECI Council will also periodically review the progress and work of each Task Force. However, the ECI Council and the ECI Secretariat will not direct and manage the work of the Task Forces. The Secretariat will provide some basic services in support of the Task Forces.

5. Advisors

ECI Advisors are individuals who are formally recognized as sources of expert advice and support for the ECI Council and Secretariat. Individuals are invited to become advisors based on their individual commitment to the Earth Charter, their capacity to actively provide advice and support for the ECI Council, the Secretariat and the Task Forces, and where relevant, their organizational affiliation. Advisors are appointed by the executive director of the Secretariat.

6. Ambassadors

The members of the Earth Charter Commission serve as ambassadors for the Earth Charter. From time to time, the Council may wish to appoint eminent public figures as additional ambassadors or official representatives to assist ECI with specific issues for a period or in connection with a particular event or a series of events. The executive director of the Secretariat may make such appointments in consultation with the ECI Council co-chairs. Ambassadors may include, for example, well-known performing artists, current or former heads of state, prominent business leaders, Nobel Prize winners or well-known civil society leaders.

7. Affiliates

ECI Affiliates are individuals or organizations that share the Earth Charter vision and are committed to promoting the Earth Charter and helping implement ECI strategies in their countries. Affiliates enter into a formal agreement with Earth Charter International to be an active source of Earth Charter information and activity in their country. The ECI Secretariat coordinates activities with Affiliates and provides them with guidance and resource materials. There may be more than one Affiliate in a country. Decisions about designating Affiliates are made by the ECI Secretariat. When a new Affiliate is being created in country where
there already exist one or more Affiliates, the existing Affiliates may be consulted. Affiliates agree to maintain close communications contact with Earth Charter International and to provide reports of important Earth Charter-related activity happening in their regions. Similarly, ECI agrees to keep Affiliates informed of key decisions and events that affect them and to provide them with some level of guidance, strategic advice, and communications support (the level of which is dependent on resource availability).

8. Partner Organizations

Strategic Partners are organizations whose activities are directly and programmatically supportive to the Earth Charter and the Earth Charter Initiative, or whose activities are in harmony with Earth Charter principles. These will mostly be international organizations, but they may also be nationally or locally focused. Partner Organizations enter into a formal agreement (a Memorandum of Understanding, Letter of Agreement, or some other formal acknowledgement) with Earth Charter International on specific projects that describe how the Partner will work to support and promote the Earth Charter and how Earth Charter International will support them.

Among the ECI partners is Earth Charter Associates, Ltd. (ECA). ECA is a legally incorporated entity based in the United States that has been created to provide legal and fundraising support for ECI. For more information, see Section X.

9. Endorsers

An Endorser is any individual or an organization that formally expresses their support and commitment to the spirit and aims of the Earth Charter document. The category of Endorser is open to organizations of any size as well as to individuals. The ECI Secretariat has actively sought the endorsement of major international and national organizations (see more information on endorsement in page 39).

10. Volunteers or Supporters

Volunteers or Supporters are Endorsers who commit and donate resources - time, money, network relationships, and public promotion or whatever is appropriate to them - to the Earth Charter Initiative. They may be organizations, governments, or individuals. “Volunteers or Supporters” are the equivalent of members in a traditional NGO membership programme, except that they acquire no formal rights from their Supporter status. Although ECI seeks broad sponsorship, it reserves the right to say “no, thanks” to specific organizations or people who might want to make a donation of some kind or promote the Earth Charter in a certain way. Supporters or Volunteers do have the right to identify themselves as a “Supporter of the Earth Charter Initiative” or a “Volunteer for the Earth Charter Initiative”.

Earth Charter International is supported by the contribution of financial resources and various other resources and services by individuals, foundations, government agencies, and other institutions. There are several ways in which financial contributions can be made.

Financial contributions in support of Earth Charter International (ECI) may be made to the Earth Charter Fund in a special Earth Charter bank account managed by the University for Peace in Costa Rica. Financial contributions may also be made to the Earth Charter Fund at The Philanthropic Collaborative managed by Rockefeller Philanthropy Advisors, Inc. (RPA) based in New York City, USA. RPA is a non profit organization (501(c)(3)) that provides philanthropic, financial and administrative services to individual donors, foundations, and a variety of non-profit organizations. On behalf of Earth Charter International, Earth Charter Associates, Ltd. engages the services of RPA.

Donors to ECI can make contributions to these two Earth Charter funds through the Earth Charter website using a credit card donation system.

Donations in support of ECI are used to cover the operating expenses of the ECI Secretariat. The bank records and transfer records of the two accounts in Costa Rica and New York are professionally maintained and are annually audited by an outside professional auditor.

The financial management of ECI is overseen by the ECI Council. The ECI Council approves an annual operating Budget for ECI. The ECI Secretariat is responsible for operating within the approved budget, for preparing financial reports and keeping the Council fully informed regarding financial affairs. The ECI Council Resource Mobilization Committee directs ECI fundraising efforts and seeks the contribution of other essential resources.

When making a contribution to the Earth Charter Fund at the University for Peace in Costa Rica in support of ECI, notification should be sent to Mirian Vilela, Executive Director of the ECI Secretariat (donation@earthcharter.org). The following information should be used for transferring contributions, including electronic cash transfers to Earth Charter International in Costa Rica.

**Name of Bank:** Banco Nacional de Costa Rica  
**Address of Bank:** Avenida Central, Calle 4 y 6, San José, Costa Rica  
**Swift Code:** BNCRCRSJ  
**Account Name:** University for Peace/Earth Charter  
**Account Number:** 100-02-099-600115-2
Financial contributions to the Earth Charter Fund at RPA can be sent to the following bank account in New York. An e-mail should be sent to Rockefeller Philanthropy Advisors noting the transfer, attention Chris Page: cpage@rpa.com.

Name of Bank: JP Morgan/Chase Private Banking  
Address of Bank: 1211 Avenue of the Americas  
New York, NY 10036 - USA  
Contact: Matthew Ingram, 212/789-5686  
ABA No.: 021 000021  
Swift No.: CHASUS33 (for international transfers)  
Account Name: Rockefeller Philanthropy Advisors, Inc.  
Account No.: 031-1-144166

(2) Travel for the Youth Programme - $14,003
(3) Inv # 7060, 7062, 7063, 8002, 8007 and 8008

3/12/08
The reduction in the ECI operating budget for 2008 in comparison with the 2007 budget reflects the closing of the Earth Charter Center for Communications and Strategic Planning in Stockholm. It is also important to understand that ECI’s operating budget is not an accurate indicator of the extent of ECI activity. Many ECI Council members and other Earth Charter supporters contribute a great deal of time and a variety of office services in support of the work of ECI. In addition, the ECI Secretariat works in collaboration with a number of partner organizations.

VI. ECI Strategy & Focus Areas

Decentralized Empowerment

“Decentralized Empowerment for Scaling Up” is the short name given to a set of policy directives and decisions originally taken at the Third Meeting of the ECI Council held in 2007. The purpose of the strategy is to enable the massive expansion of the Earth Charter Initiative without having to grow the central administration, and to allow for a vast number of self-organizing efforts to multiply and grow.

In support of this new strategy, the following documents have been prepared and posted on the ECI website:

- Action Guidelines for Decentralized Expansion of the Earth Charter Initiative
- How You Can Participate

Following these guidelines, any person, organization, or community can make use of the Earth Charter and put it to work in appropriate ways commensurate with their capacities and opportunities.

ECI’s central administration maintains the website and the various sign-up mechanisms, but attempts to reduce to a minimum the amount of administrative work associated with this strategy.

Action Guidelines for Decentralized Expansion of the Earth Charter Initiative

Introduction

Earth Charter International (ECI) encourages everyone inspired by the Earth Charter to contribute to the goals of the Earth Charter Initiative. Your active participation and support are needed. In this connection, ECI is in the process of scaling-up the Initiative worldwide by promoting decentralized activity and the empowerment of individuals, communities and organizations.

As ECI undertakes this new strategy, it will continue to promote the Earth Charter through various formal international processes and a limited number of projects. However, this new strategy is necessary because the Earth Charter International secretariat is only able to organize and direct a small portion of the wide range of actions needed to implement the Earth Charter vision.

The Action Guidelines presented below are a resource designed to help people conduct Earth Charter related activities in ways that are in harmony with the values and principles of the Earth Charter.

The purpose of the Action Guidelines is also to ensure a certain measure of consistency in how decentralized actions on behalf of the Earth Charter are carried out. Think of the Guidelines as a kind of virtual
coordinating mechanism for the Earth Charter Initiative as it prepares for a rapid decentralized expansion that could involve the actions of many millions of people worldwide.

The Action Guidelines are addressed first and foremost to individuals. The full implementation of many principles in the Earth Charter will require action on the part of governments, corporations, and other organizations. However, the commitment of individuals is the ultimate source of leadership and change for a better world and the contributions of all people in all sectors is essential.

The Action Guidelines are not fixed and final. The Earth Charter International Council will periodically review them in the light of lessons learned from efforts to apply the Earth Charter in different regions and sectors. The Council welcomes any comments and suggestions you may have regarding them.

The Action Guidelines

1. **Start with the Earth Charter.** Let the Earth Charter be your basic guide when you are planning and undertaking activities to make the Earth Charter vision a reality.

2. **Be a Living Example.** Strive to be a living example of the spirit of the Earth Charter in your day-to-day life – at home, in the work place, and in your community.

3. **Empower Yourself.** Act boldly, and trust that you can make a difference as an individual and that your activities will catalyze the efforts of many others.

4. **Cooperate, Cooperate.** Create the power to affect change by building partnerships and collaborating with others, and seek win/win solutions.

5. **Empower Others.** Share power by being inclusive and providing others with opportunities to strengthen their capacities for problem solving, decision-making, and leadership, unleashing human creativity.

6. **Promote Respect and Understanding.** Endeavor to build relationships of mutual respect and trust among individuals and groups from diverse cultures and communities, and resolve differences through dialogue in a way that produces learning and growth.

7. **Facilitate Self-Organization.** Facilitate the spread of initiatives inspired by the Earth Charter without trying to control them, counting on the capacity of human groups with a clear ethical purpose to self-organize and achieve positive outcomes.

8. **Focus on Root Causes.** Focus thought and action on the root causes of the major problems and challenges facing humanity, and do not let the pressures of existing unsustainable systems and practices deter you from action.

9. **Be Committed Yet Flexible.** Be unwavering in your commitment to fundamental principles and ensure that the means adopted to achieve your goals are consistent with Earth Charter values, but always be flexible and innovative in selecting means and methods as circumstances change.

10. **Be Resourceful.** Do not let your thinking and acting be restricted by dependence on money; use your imagination and be resourceful in making things happen.

11. **Use Technology Wisely.** Be mindful that large numbers of people do not have access to advanced technology, and when constructing technological solutions to problems ensure that they are appropriate.

12. **Protect the Integrity of the Charter.** When presenting, quoting from, or translating the Earth Charter
be faithful to the words and spirit of the original text, and link the Charter only with organizations, products and events that are consistent with its values and vision.

Earth Charter Initiative Task Forces – A Brief Overview

At its third annual meeting in May 2008, the Earth Charter International (ECI) Council approved the creation of six Task Forces as part of a new long range plan that is based on the principle of decentralized empowerment and is designed to rapidly expand Earth Charter activities around the world. Each Task Force are focused on developing a network and promoting activities in one of the following areas:

- Business
- Education
- the Media
- Religion
- the United Nations
- Youth

These six areas were chosen because they provide significant opportunities for using the Earth Charter strategically to advance the transition to sustainable ways of living. In most of these six areas, there are already a number of promising activities and projects on which the Task Forces can build. In all these areas there is also the potential for interest in the Earth Charter to spread quite spontaneously or organically beyond the initial catalyzing effect of the Task Forces.

The Task Forces have been designed to operate as volunteer networks that will lead to independent initiatives. They have been conceptualized by the ECI Council and launched by various ECI Council members acting as “seed” team members. The ECI Council executive committee will approve appointment of the leadership team for each Task Force. The ECI Council will also periodically review the progress and work of each Task Force. However, the ECI Council and the ECI Secretariat will not direct nor manage the work of the Task Forces. The Secretariat will provide some basic services in support of the Task Forces. The Secretariat may also play a role in advancing the work of some Task Forces when it has the expertise and resources to be helpful as in the case, for example, of education. It is expected that the Task Force leadership teams will include many individuals who are not members of the ECI Council, and that other organizations will provide services for the Task Forces, thereby giving further effect to the concept of an “extended secretariat”.

The rationale behind the decentralized empowerment strategy and the establishment of the Task Forces is based on the reality that the Earth Charter Initiative is a network and not a formally incorporated non-governmental organization (NGO). It is not possible for the Earth Charter Initiative to expand its influence around the world and realize its mission if it is conceived as a conventional organization where all activities are directed and controlled by one organization, the ECI Secretariat. Given the Earth Charter’s mission it would be impossible for even a large NGO to oversee the activities of the global Earth Charter Initiative and the cost and complexity of attempting such an undertaking would be extraordinary. It would be an impossible task and an unwise plan.

In actuality the Earth Charter Initiative has developed as a network of thousands of individuals and organizations that sometimes collaborate and often act independently. The ECI Council establishes policies and strategies for the ECI Secretariat and these policies and strategies also provide some guidance for the larger
network that forms the Earth Charter Initiative. The small Secretariat provides a limited number of core services such as management of the international website and preparation of basic materials and resources. The offices of a number of ECI Council members already support and assist the Secretariat and constitute an extended Secretariat office in different regions of the world.

The leadership of each Task Force is envisioned to be a team of approximately two to ten individuals. The purpose of each Task Force is to catalyze new Earth Charter activity and to promote a dramatic expansion of the Earth Charter network. Each Task Force will begin its work by clarifying the distinctive contribution the Earth Charter can make in its area and the niche that the Earth Charter can appropriately fill. It will also be necessary to develop a plan of action with short and long range goals and strategies for achieving these goals. The Task Force will then enlist the volunteer leadership and support needed to implement its plans and must mobilize the necessary resources. Each Task Force will become its own network of Earth Charter ambassadors and activists.

As part of the new long range plan, the ECI Council also approved two other projects that involve improving the current worldwide web platform of the Earth Charter Initiative and preparing the communications materials, including books, brochures, and films, required to support expansion of the Initiative in the areas on which the Task Forces are focused. The worldwide web platform will involve establishing a local website in every nation in an appropriate language or languages. These local websites will all be equipped with the same basic information about the Earth Charter and the Initiative, and they may be further developed to address the local context. The Secretariat will assist with these two projects.

The Secretariat will post on the Earth Charter International website periodic reports on the activities of the Task Forces and on the progress of the two related projects. Individuals interested in supporting the work of a Task Force are encouraged to contact the leadership team directly.

Business

Recognizing the need for new collaborative forms of governance, the Earth Charter states: “A partnership of government, civil society, and business is essential for effective governance” (The Way Forward). In accord with this principle, ECI has adopted a strategy for engaging businesses in the Earth Charter Initiative. A major part of this strategy involves working in partnership with business leaders and building alliances with business related initiatives, such as the UN Global Compact and the Global Reporting Initiative (GRI). In the context of these alliances, business leaders are invited to use the Earth Charter as a common ethical framework in their dialogue with civil society actors and other stakeholders. Businesses that support the Earth Charter, but do not yet participate in GRI are encouraged to do so.

After extensive research and dialogue, ECI, in cooperation with the Dutch National Committee for International Cooperation and Sustainable Development (NCDO), has developed a Guidance Paper that responds to questions about how the Earth Charter relates to other leading global initiatives such as the UN Global Compact and the Global Reporting Initiative (GRI). This paper is designed to help Earth Charter users and those using the GRI and Global Compact to understand the synergies and complementary strengths of these three initiatives. It endeavors to explain how businesses can integrate the Earth Charter into the reporting processes organized by GRI and other similar efforts. ECI places special emphasis in its work with businesses on the value of adopting GRI guidelines. An alliance with the GRI is being developed along these lines.
The Earth Charter International encourages all businesses to use the Earth Charter in one or more of the following ways:

**Engage** employees with the Earth Charter for the purpose of learning, training, and inspiration.

**Assess** the activities of the business in the light of Earth Charter values and principles, using the Global Reporting Initiative's Guidelines.

**Incorporate** Earth Charter values and principles in the business mission statement and its core operations with the goal of developing a more socially and ecologically responsible business.

ECI will not attempt to create a special administrative staff for this focus area, nor will it monitor individual business participation. Instead, ECI will develop resources that will be made available via the website, and encourage businesses to participate in this focus area by endorsing the Earth Charter, making use of the resources, and taking actions of the kind described above.

A Task Force to help implement the Earth Charter strategy in the field of business is being put in place. See the Principles for Engaging Business in the Earth Charter Initiative in Section VII.

**Education**

Education is fundamental to the mission of Earth Charter Initiative and ECI has therefore created the Earth Charter Center for Education for Sustainable Development at the University for Peace in Costa Rica. The Center’s mission is to promote the use of the Earth Charter in schools, colleges, universities, and non-formal education programmes throughout the world and to contribute to education for a sustainable way of life. A Task Force has been put in place to help implement the education strategy, and it will work in close collaboration with the Center.

The Center pursues the following strategies:

1. Outreach to educators via education networks.

2. Promotion of formal institutional adoption and implementation of Education for Sustainable Development, with the Earth Charter as primary reference document.

3. Development of courses and materials to be disseminated through education and environment ministries and key strategic partnerships.

4. Coordination and support of a network of organizations and individuals using the Earth Charter as an educational tool.

The Center is an active partner of UNESCO in supporting the UN Decade of Education for Sustainable Development, and the UNESCO Education Sector recently published a book prepared by the Center entitled *Good practices using the Earth Charter.*
The Media

The goal of the media strategy is to influence key people in the field of media organizations (TV, print media, advertising and entertainment), including entrepreneurs, corporate executives, journalists, advertising agencies’ creative directors, screenwriters, TV producers and news editors that shape the content of the media. A Task Force is taking the lead in moving this project forward and is developing and working on a strategic plan to reach people in this field and encourage them to integrate the Earth Charter vision into their frame of reference. The rationale is that communication and media professionals and entrepreneurs influence mindsets, lifestyles and consumption habits all over the world. If their thinking becomes more aligned with Earth Charter values, they will then start to generate positive changes that will have a wide ripple effect.

Religion

Launched in Fall 2007 after a year of research, strategy development, and fundraising, the ECI Project on Religion and Sustainability is dedicated to interreligious outreach and supports religious organizations and institutions in their engagement with the global challenges of our time.

The principal strategy of this effort, as determined by extensive needs research, is the creation of high quality communications and education materials and programmes designed specifically for religious audiences. These materials and activities will promote a holistic and systematic way of understanding the fundamental challenges of our time. Building on both the best of current science and research, and the unifying ethical perspective (and historical legacy) of the Earth Charter, ECI materials will provide critical information on these challenges to religious leaders and groups. The materials will interpret, in the sense of “translate”, current knowledge and best practice into terms that religious audiences will find compelling, inspiring, and empowering.

In the production of the materials, ECI intends to draw on the experiences, competences and resources of a wide range of partner organizations such as the Forum on Religion and Ecology at Yale University (www.yale.edu/religionandecology), which has put together an extensive bibliography in the world’s religions and ecology as well as on religion and development that will provide a fruitful starting point for ECI’s educational endeavours in this field. This project also supports ECI’s engagement with the United Nations High Level Dialogue on Inter-Religious and Inter-Cultural Understanding.

This project is coordinated by Michael Slaby, based in Heidelberg, Germany: mslaby@earthcharter.org

A Task Force to help implement the Earth Charter and Religion strategy is also being put in place.

The United Nations

The purpose of ECI activity in this focus area and of the UN Task Force is to achieve recognition of the Earth Charter by the United Nations General Assembly and to demonstrate the relevance of the Earth Charter’s values and principles to global governance.

The United Nations Task Force has adopted three strategies:
1. Climate Change Project—to promote use of the Earth Charter's ethical framework in the international climate change negotiations on a post-Kyoto Agreement.

2. Endorsement by UN Agencies—to seek recognition and use of the Earth Charter by UNESCO, UNEP, UNDP, and the UN regional economic commissions.

3. UDHR Project—to further collaboration between the Earth Charter Initiative and the Universal Declaration of Human Rights.

Youth

The Earth Charter Youth Initiative (ECYI) is a bold and dynamic action-oriented youth network that promotes the principles of the Earth Charter. The ECYI is active in over 70 countries and continues to grow rapidly, with more than 40 Earth Charter Youth Groups (ECYGs) around the world. ECYGs organize local sustainability and peace building projects that are inspired and guided by the Earth Charter. Diverse individual members seek to embody the Earth Charter's principles in their daily lives, share the Charter with others, and participate in local action projects, as well as global decision-making processes.

A Youth Task Force (YTF) has been established, led by the elected 12-person Youth Leadership Team, the two Youth Representatives on the Earth Charter International Council, and the International Youth Coordinator. The goal of the YTF is to inspire, engage and empower young people to live, love, and take action based on the values and principles embedded in the Earth Charter.

The Youth Task Force embraces the Vision for the Earth Charter Initiative as set forth by the International Council and aspires to achieve its special Mission to: “Inspire hope within and through the global ECYI network that positive change is possible. Support youth in embodying, promoting, and applying the principles of the Earth Charter in an effort to bring about a just, sustainable, and peaceful world.”

The YLT strategy is to model and then support the decentralized creation of engaged Action Teams that implement Earth Charter-inspired projects in all sectors at the regional and global levels. The current YLT (2007-2009), has established thematic Action Teams and projects in:

• Education
• Media
• The United Nations

Following their lead, others can start Action Teams in Business and Religion, for example. Furthermore, two internal Action Teams have been formed:

• Communications and Networking
• Resource Mobilization and Partnerships

Finally, in order to promote expansion of the ECYI network, five regional Action Teams have been formed:

• Africa and the Middle East
• Asia and the Pacific
• Europe and Central Asia
• Latin America and the Caribbean
• North America

Action Teams are guided by the “Action Guidelines for Decentralized Expansion” and are inclusive in terms of membership. Their projects are designed in such a way as to welcome new people to join and contribute. Thematic Action Teams, when appropriate, seek to integrate their activities with those of other Task Forces, though new Action Teams and projects may be created in other sectors as well. Indeed, over time, all Task Forces will be partly constituted by former YTF members.

How you can participate in the Earth Charter Initiative

1. Disseminate the Earth Charter and raise awareness about it among your friends and in your local community.

2. Endorse the Earth Charter and encourage the organizations to which you belong and your local and national governments to use and endorse the Earth Charter.

3. Start an Earth Charter study group and explore how to use the Earth Charter and apply its principles in your home, work place, and local community.

4. Join in the work of one of the Earth Charter Initiative Task Forces which are active in six focus areas – Education, Business, the Media, Religion, Youth and the United Nations.

5. Collaborate with Earth Charter Partners and Affiliates and with other organizations that have endorsed the Earth Charter in your region.

6. Make financial contributions or provide other resources and needed services in support of Earth Charter International and other Earth Charter projects.

7. Consult and follow the Action Guidelines for Decentralized Expansion of the Earth Charter Initiative, which may be found on the Earth Charter website.

There are many ways to use the Earth Charter in schools, businesses, governments, NGOs, conferences, and public events. For example, it can be used as:

• an educational tool for developing understanding of the critical challenges and choices facing humanity and the meaning of a sustainable way of living.

• a call to action and an ethical guide to a sustainable way of life that can inspire commitment, cooperation, and change.
• a values framework to guide governments at all levels in the design of policies and strategies for building a just, sustainable and peaceful world.

• a comprehensive framework for defining corporate social and ecological responsibility and formulating related mission statements and professional codes of conduct.

• a catalyst for multi-sectoral, cross-cultural and interreligious dialogue on common goals, shared values and global ethics.

• a soft law document that provides an ethical foundation for the on-going development of environmental and sustainable development law.

• an instrument for assessing progress toward the goal of sustainability.
VII. ECI Council Policy Statements

Guidelines for the Organization and Operation of the ECI Council
Version 2.0, 10 April 2004, revised during ECI Council meeting in May 2008

A. Membership

1. The Council shall have no fewer than 15 members and no more than 25. The membership of the Council shall reflect geographical distribution, cultural diversity, gender and age balance, and diverse spheres of professional expertise relevant to the goals and programmes of the Earth Charter Initiative.

2. Council members shall be elected for a three-year term and may serve two three-year terms after which they may not be reelected to the Council for at least one year. There will be three classes of Council members with staggered terms so as to ensure some continuity in membership.

3. The executive director of the ECI Secretariat shall serve as an ex officio member of the ECI Council with the understanding that he or she may not participate in the deliberations of the Council or vote on matters where there could be a conflict of interest.

4. In the case of any vacancy on the Council for any cause, the Council may elect a new member to hold office for the unexpired term of the Council member whose position has become vacant.

B. Officers

1. The Council shall have a chair or co-chairs and such additional officers as the Council may decide—for example, a vice chair, treasurer, and secretary.

2. Meetings will be chaired by the chair or co-chairs. In the absence of the chair or co-chairs, the vice chair will chair a meeting, if a vice chair has been elected.

C. Meetings

1. The Council shall hold at least one meeting a year at a time and place to be determined by the chair, co-chairs, or Council.

2. Notice of meetings will go out to Council members at least one month prior to the meeting and significantly earlier whenever possible. However, in the case of a special meeting called to address an urgent issue, notice may go out only ten days in advance of the meeting.

3. One of the regular Council meetings will be an annual meeting at which officers (including the chair or co-chairs and the chief executive officer for Earth Charter International) and Council members are elected.

4. Additional meetings of the Council may be called by the chair or co-chairs, the Council, or a group of five or more Council members.
5. The presence at a meeting of half the members of the Council or more shall constitute a quorum for the transaction of business. A Council member participating by telephone conference call shall be considered present.

6. The chair or co-chairs will make every effort to develop a consensus on important issues. When the person chairing a meeting believes that a consensus may have been reached, he/she may call a test vote to determine if all Council members present are in agreement. If a vote reveals that a consensus has been reached, the chair will declare that there is a consensus and the matter has been decided. If the test vote reveals that there is not a consensus, the chair may continue the Council’s deliberations on the matter under consideration or postpone further discussion to a later date. If the chair determines that a decision on the matter under consideration must be made without further delay in order to resolve urgent business of Earth Charter International, the chair may put the matter to a formal vote. Under these circumstances, a majority of those present at a meeting is sufficient to approve or defeat a resolution. A formal vote will involve determining those who are in favor, opposed, and abstaining.

7. As a general rule, resolutions proposed for adoption by the Council will be presented to the Council in writing.

8. When there are compelling reasons to do so, Council meetings may be conducted by conference telephone or another similar mode of communication that allows all persons participating in the meeting to hear each other at the same time.

9. As a general rule, when a Council member is not able to attend a meeting, he or she may not send a representative to participate in the Council meeting. However, when there are very compelling reasons to do so, the co-chairs may permit a well qualified representative to attend a meeting with the understanding that the representative will not have a vote.

10. At least once a year, the Council will meet in executive session during one of its meetings.

11. Minutes of each Council meeting will be prepared, distributed to the Council members, and submitted for the members’ approval at the next Council meeting.

D. **Action by Unanimous Written Consent**

1. The Council may take action without a formal meeting at any time by the unanimous written consent of all its members (an e-mail will suffice) to a written resolution authorizing action of the kind that might be taken at a regular meeting.

E. **Committees**

1. The Council shall appoint an Executive Committee of five to eight members to transact business on behalf on the Council between meetings. The Executive Committee will be chaired by the chair or a co-chair of the Council and will report to the Council on all actions taken by the committee at the next meeting of the Council.

2. The Council shall appoint a Nominating Committee of three to five persons that presents nominations for Council membership.

3. The Council shall create such other committees as the chair, co-chairs, or Council decides are needed. The Council will prepare a written statement of the responsibilities of all committees.
4. The Nominating Committee shall nominate and the Council shall elect at its annual meeting the membership of the Executive Committee, Nominating Committee, and any other standing committee. The Nominating Committee will consult with the co-chairs regarding all nominations for membership on all these committees. The Council chair or co-chairs will appoint the members of any ad hoc committee that the chair, co-chairs, or Council creates.

F. **Reimbursement of Council Members**

1. Members of the Council shall not receive compensation for their service on the Council but may be reimbursed for travel and lodging expenses directly related to Council meetings.

G. **Annual Report**

1. The Council will issue an annual report on the activities of the Council and Earth Charter International, including a financial report. The annual report will be prepared by the executive director under the oversight of the chair or co-chairs and Council.

**Responsibilities of the Earth Charter International Council**

*Version 2.0, 10 April 2006*

The Earth Charter International Council (hereafter referred to as “the Council”) is responsible for providing leadership in support of the mission of the Earth Charter Initiative, which is to establish a sound ethical foundation for the emerging global society and to help build a sustainable world based on Earth Charter values. The Council has responsibility for overseeing the activities of Earth Charter International Secretariat, which includes the Secretariat and the Center for Education for Sustainable Development at the University for Peace, and for overseeing the progress of the larger Earth Charter Initiative.

More specifically, the responsibilities of the Council and its members are to:

1. Elect the members of the Council.
2. Elect a chair or co-chairs of the Council and such other officers as the Council decides are appropriate, such as a vice chair, treasurer, and secretary.
3. Appoint the Executive Director of Earth Charter International and oversee his or her activities.
4. Appoint an Executive Committee of five to eight members to act on behalf of the Council between meetings and a Nominating Committee of three to five members.
5. Create such other committees as the Council may decide are necessary. The responsibilities of each committee should be carefully defined.
6. Define the mission of the Earth Charter Initiative and issue the mission and vision statements for the Earth Charter Initiative and an organizational vision statement for Earth Charter International.
7. Approve an annual operating budget for Earth Charter International. An operating budget will be prepared by the executive director and submitted to the Council for its review and approval.
8. Set major policies and strategic guidelines for Earth Charter International and approve major plans and partnerships. The executive director and senior management team will bring their recommendations for new policies, strategic guidelines, and partnerships to the Council for approval.

9. Undertake long-range planning, working together with the executive director and senior management team.

10. Approve a resource mobilization strategy to meet the financial needs of Earth Charter International and actively support the efforts of Earth Charter International to mobilize financial and other resources.

11. Promote and monitor an ongoing worldwide, cross-cultural dialogue on the Earth Charter and global ethics. Ensure that criticisms and misinterpretations of the Charter are carefully analyzed and that appropriate responses are made to attacks on, or misinformation about, the Earth Charter when a response will serve a good purpose from the perspective of the mission of the Earth Charter Initiative.

12. Ensure that the Earth Charter, the Earth Charter Initiative logo, and the titles “Earth Charter International” and “Earth Charter Initiative” have appropriate legal protection.

13. Provide leadership that keeps the activities of the Council, Earth Charter International, and Earth Charter Initiative in accord with the values of the Earth Charter.

14. Confirm appointment of Earth Charter Ambassadors who have been nominated by the executive management team or Council members.

15. Keep well informed regarding the activities of Earth Charter International and the Earth Charter Initiative.

17. Provide leadership and support for Earth Charter activities locally and regionally and, as appropriate, globally.

18. Be available to provide advice to the Earth Charter International staff.

19. Ensure that the Earth Charter Commission receives the annual report of Earth Charter International and is kept informed of major developments, especially with reference to the dialogue and debate surrounding the Earth Charter document.

20. Prepare and revise as appropriate a set of guidelines for the organization and operation of the Council.

**Council Rotation Plan**

Council members are elected by the ECI Council to serve a three-year term, and they may be reelected for one additional three-year term, after which they are not eligible to be reelected as a Council member for one year. *The first terms of the founding members of the Council have been designed to end on different years in order to ensure some continuity of membership on the Council. The years the Council members’ first and second term expire are listed below.*

**2008 (end of first term)**

Mateo Castillo (Mexico)
Rick Clugston (United States)
Marianella Curi (Bolivia)
Camila Argolo Godinho (Brazil)
Zainab Bangura (Sierra Leone)
Wakako Hironaka (Japan)

2009 (end of first term)
Li Lailai (Peoples Republic of China)
Song Li (Peoples Republic of China / United States)
Alexander Likhotal, (Russia / Switzerland)
Brendan Mackey (Australia)
Elizabeth May (Canada)
Oscar Motomura (Brazil)
Steven Rockefeller (United States)

2010 (end of first term)
Dumisani Nyoni (Zimbabwe)
Henriette Rasmussen (Greenland)
Mohamed Sahnoun (Algeria)
Kartikeya Sarabhai (India)
Tommy Short (United States)
Mary Evelyn Tucker (United States)
Razeena Omar (Republic of South Africa)
Erna Witoelar (Indonesia)

2011 (end of second term)
Zainab Bangura (Sierra Leone)
Mateo Castillo (Mexico)
Rick Clugston (United States)
Marianella Curi (Bolivia)
Camila Argolo Godinho (Brazil)
Wakako Hironaka (Japan)

Process for Election of New Council Members
(Council Action 2007-002)

Council members are elected by the ECI Council to serve a three-year term and may be re-elected for one additional three year term after which they are not eligible to be re-elected as a Council member for one year.

New Council members will be appointed to fill vacancies on the Council, or in order to bring to the Council complementary expertise.

The Council will appoint new members to the Council on the recommendation of the Nominating Committee; The Nominating Committee is a standing committee of the Council.

In appointing new Council members, the Council will endeavour to ensure Council membership is gender balanced, reflects regional diversity, has representatives from the Earth Charter Youth Initiative, and honours the founding organisations, the Earth Council and Green Gross International.

The nomination processes will be as follows:

1. Active participants in the Earth Charter initiative, including Council Members, Affiliates, and Special advisers, will be invited via a general internet communication to recommend candidates to the Nominating Committee.

2. The Nominating Committee will make clear in the internet invitation the characteristics and qualities the Council is seeking in the new member, including considerations of gender, youth, regional and other representation considerations.

3. All recommendations for candidates will be treated in confidence by the Nominating Committee.
4. The Nominating Committee will be responsible for undertaking due diligence on recommended candidates, and where necessary will seek advice from Council members, Special Advisors and Affiliates on the suitability of candidates.

5. The Nominating Committee will nominate a candidate for the Council’s approval, and provide them with the reasons for their recommendation.

**Procedural Notes:**

The nomination processes should be posted on the Earth Charter web site, along with a link to the document that describes the responsibilities of Council members.

An explanatory note should also be added clarifying that Council members are appointed as individuals, not as representatives of any organization with which they are affiliated with the exception of the two founding organizations mentioned above. Similarly, whilst the Council membership should reflect regional diversity, Council members are not appointed nor expected to function as official “regional representatives”. However, Council members will be expected to be able to bring to the Council meetings insight into regional issues.

**Strategy Guidelines**  
*Version 1.1, 27 April 2006*

During this year of transition, Earth Charter International will develop programmes and set priorities based on the following guidelines.

Our programmatic work should seek to:

1. Make the current global imperative for action on sustainable development clear and compelling. The ultimate goal is to change hearts and minds, and to generate action.

2. Build hope and counter cynicism by demonstrating and highlighting what is proven and possible (e.g. “best practices”); by using the communications power of stories, symbols, and experiences; and by helping people to feel that they are part of a larger global transformation process.

3. Seek to move the Earth Charter deeper into the mainstream.

4. Deepen the dialogue on sustainable development and global ethics.

5. Maintain and promote the whole-systems, integrated view of sustainable development, as reflected in the Earth Charter.

6. Support the development of global civil society.

7. Promote the Earth Charter as an international soft law document, and support its adaptation for use in governance in other sectors (such as business and local government).

8. Actively engage the Endorsers of the Earth Charter and urge them to take action in support of their endorsement.
9. Build strategic partnerships with other organizations to promote mutual objectives and to avoid competition.

10. Seek avenues to engage with global governance processes, such as the WTO, to promote the ethical dimension of good global governance.

11. Work with policy and decision makers on integrating the Earth Charter into governance processes.

12. Seek to contribute to international efforts on development, inter-faith dialogue, disaster preparedness and relief, and the emerging global energy crisis.

13. Create clear goals for the Initiative in the short, medium, and long-term, and develop indicators for measuring progress.

14. Be in harmony, as much as possible, with the values and principles of the Earth Charter itself.

15. Celebrate life!

Policy on Global Engagement
Version 1.0, 4 April 2006

The Earth Charter Initiative will engage with global issues and processes, according to the following guidelines:

1. ECI will strongly promote engagement and action, in a general sense, on major global issues.

2. ECI will encourage and facilitate dialogue processes that explore global issues from the perspective of the Earth Charter.

3. ECI will consult with its global constituency before taking a position on any specific approach (or set of approaches) to solving global problems.

4. ECI will focus special attention on a small number of international, UN-led processes addressing urgent global issues, promote action on those issues, and promote the use of the Earth Charter as an ethical framework for addressing those issues. These include efforts to:
   - Address climate change
   - Achieve the Millennium Development Goals
   - Conserve biodiversity
   - Promote sustainable lifestyles and livelihoods
   - Promote non-violent conflict resolution and a culture of peace
   - Provide Food Security
**Fundraising Principles**

*Version 2.0 - 28 May 2007*

Revised and edited from a set of Principles that were proposed by Council Member Oscar Motomura; and accepted by the Council on a provisional basis. These Principles shall be reviewed from time to time.

1. **Integrity:** The method by which ECI obtains its resources shall not negatively affect ECI’s identity, public image, or reputation as an initiative with the highest level of ethical awareness and commitment to the common good of all living beings. In raising resources, ECI must avoid all situations that could be classified as being in conflict with its fundamental purpose.

2. **Inclusiveness:** Any fundraising process that might lead to any form of fragmentation in the Earth Charter Initiative; to the exclusion of certain people or organizations with fewer resources; or to the granting of some special advantage to a small number of people or organizations, shall be considered inappropriate.

3. **No Commercialization:** The Earth Charter’s identity shall not be utilized for commercial purposes in connection with fundraising. ECI will avoid traditional “sponsored by” commercial announcements and will not accept donations that come with sponsorship advertising as a condition of the donation.

4. **Equity of Appreciation:** ECI will welcome unconditional support of all kinds -- material, financial, service, time, etc. -- from all types of people and organizations, at whatever level is appropriate to them; and all contributions shall be equally valued and appreciated. “Unconditional” means contributions not tied to “quid pro quo” conditions, the conferment of special status, or to expectations of reward or compensation, as noted above. ECI reserves the right to say “No, thanks” to donations from sources that could be perceived as compromising the Earth Charter’s identity or integrity.

5. **Transparency:** All contributions to ECI will be recorded and accounted for in the ECI Financial Reports, including contributions that are made anonymously. The identity of anonymous contributors shall be known by the ECI Executive Committee and Executive Director, and shall be kept under confidentiality. This practice will allow auditors to conduct independent evaluations of the sources and uses of funds.

6. **Multiple Avenues for Contribution:** Earth Charter International will make available a large number of “avenues for contribution” -- different methods of donation, adjusted to different circumstances faced by people and organizations throughout the world. These avenues shall include, for example:

   a. Direct financial donation to Earth Charter International.
   b. Indirect financial donation, via the purchase of goods or services that are then donated to ECI.
   c. Direct in-kind contribution of goods or services.
   d. Contributions to national- or local-level Earth Charter affiliates, groups, or projects.
   e. Donations of real estate, stock, and other financial instruments.
   f. Donated advertising space / time in communications media.
   g. Transfers of intellectual property, such as patents, copyrights, or other ownership rights of any kind and any other avenues that might emerge over time. ECI will accept those donations that allow it to continue upholding its ethical criteria, that do provide a benefit to the Earth Charter Initiative, and that do not impose an undue burden on the coordinating administration of the Initiative.
Policy on Public Statements  
*Version dated 1 October 2006*

To support ECI’s general policy of encouraging engagement in critical ethical issues of world importance, the Earth Charter International Council recommends the following as guidelines to Executive Staff and Council members:

1. ECI will create a standard statement that can be issued by Executive Staff in response to critical world events, especially when ECI is being called upon for comment that (1) reminds people that the Earth Charter exists, (2) summarizes what the Charter says in relationship to important global issues or events, (3) notes when those events are clearly not consonant with the ethical principles of the Earth Charter, and (4) notes how the Charter can be used in positive ways to address that issue.

2. ECI will use the Earth Charter website to facilitate global dialogues on critical global issues, from the integrated ethical perspective of the Earth Charter.

3. As a general rule, the Council will not issue statements on current events. The Council reserves the right, however, to issue statements or endorsements at its discretion.

4. The Council may commission special reports or white papers on specific issues. These may be published in the form of “reports to the ECI Council,” at the Council’s discretion.

5. The Council recommends to its members that, when they address issues in a public forum and identify themselves as ECI Council members, they speak from the perspective of the integrated vision of the Earth Charter, and for the creation of a just, peaceful, and sustainable world.

6. Council members may prepare individual statements providing clarification on the meaning and application of specific aspects of the Earth Charter, from their perspective, and make these statements available to other Council members and Staff for use as appropriate. These statements will not, however, be issued officially by the Council.

Principles for Engaging Business in the Earth Charter Initiative

The following working principles, should guide ECI engagement with businesses. They were adopted by the Council in 2007 and revised by the Executive Committee on 2 July 2008 in the light of decisions made at the May 2008 Council meeting.

1. Support (financial and in-kind donations) will be accepted from businesses that meet the terms of the Fundraising Guidelines set by the Council at its March 2006 meeting.

2. Endorsement of the Earth Charter is not a condition for accepting support from business organizations.

3. Endorsement by businesses and corporations should, as with all acts of Endorsement, be considered a serious commitment to engage with the Charter and its Principles.

4. The overarching purpose of engaging businesses with the Earth Charter is to inspire and deepen their commitment to social and ecological responsibility.
Endorsement of the Earth Charter by individuals or organizations signifies a commitment to the spirit and aims of the document. It is an indication that they intend to utilize the Earth Charter in ways that are appropriate given their situation. For example, an organization might use the document to review its operations and modify its activities so that they better reflect the principles of the Earth Charter, and it might integrate the Earth Charter into its educational programmes. Endorsement also means a commitment to work for the implementation of the values and principles of the Earth Charter and a readiness to cooperate with others in this endeavor. There are many other ways that those who endorse the Earth Charter can help to advance the objectives of the Earth Charter Initiative.

Endorsement is one of the ways the Earth Charter has acquired legitimacy. The legitimacy of the Earth Charter as a guiding ethical framework comes primarily from the inclusive global process that generated the document. However, the endorsement of the Earth Charter since its launch in 2000 by over 4,800 organizations that represent the interests of hundreds of millions of people is another source of the Earth Charter’s legitimacy as an ethical guide.

Endorsement of the Earth Charter is open to anyone and any institution. Earth Charter International makes a concerted effort to verify endorsements and ECI assumes that endorsement includes an agreement that the Endorser may be publicly identified as an Earth Charter Endorser.

**Endorsement Statement on ECI Website:**

Endorsement of the Earth Charter involves agreeing to and signing the following statement:

“We, the undersigned, endorse the Earth Charter. We embrace the spirit and aims of the document. We pledge to join the global partnership for a just, sustainable, and peaceful world and to work for the realization of the values and principles of the Earth Charter.”

Additionally, it is expected that an Endorser will:

1. Actively promote the Earth Charter and follow the Action Guidelines stated in Section VI.

2. Contribute to the Earth Charter Initiative and to Earth Charter-inspired action projects in whatever way is most appropriate.

3. Implement the Earth Charter in his/her professional work and personal life.
Sample of organizations that have endorsed the Earth Charter

African Women's Development and Communication Network, Kenya
Arab Office for Youth and Environment, Egypt
Associação Portuguesa de Educação Ambiental - ASPEA, Portugal
Australian Centre for Environmental Law
Bellagio Forum for Sustainable Development
The Club of Budapest
National Council on Environment and Sustainable Development, Portugal

IX. A Short History of the Earth Charter Initiative

The Earth Charter is a people’s declaration on global interdependence and universal responsibility that sets forth fundamental principles for building a just, sustainable, and peaceful world. It endeavors to identify the critical challenges and choices facing humanity in the twenty first century. Its principles are designed to serve “as a common standard by which the conduct of all individuals, organizations, businesses, governments, and transnational institutions is to be guided and assessed.” (Earth Charter Preamble). The Earth Charter is the product of a decade long, world-wide, cross-cultural, dialogue on common goals and shared values conducted during the 1990s. This process, which involved the most open and participatory consultation process ever associated with the drafting of an international document, is the primary source of the legitimacy of the Earth Charter as an ethical guide.

I. Origins of the Earth Charter

Among the many recommendations in Our Common Future (1987), the report of the World Commission on Environment and Development (WCED), is a call for creation of a “Universal Declaration on Environmental Protection and Sustainable Development” in the form of a “new charter” with principles to guide nations in the transition to sustainable development. Building on this recommendation, Maurice F. Strong, the secretary general of the 1992 Rio Earth Summit (UN Conference on Environment and Development), proposed in 1990 that the Summit draft and adopt an Earth Charter. Intergovernmental consultations were held on the Earth Charter during the preparatory process for the Rio Earth Summit, but an intergovernmental agreement on principles for an Earth Charter could not be reached. The Rio Declaration, which was issued by the Summit, contains a valuable set of principles, but falls short of the inclusive ethical vision that many people hoped to find in the Earth Charter.

Therefore, in 1994, Maurice Strong, as chairman of the Earth Council, joined with Mikhail Gorbachev in his capacity as president of Green Cross International to launch a new Earth Charter initiative. It was Jim McNeill, secretary general of the WCED, Queen Beatrix and Prime Minister Ruud Lubbers of The Netherlands who brought Strong and Gorbachev together. The Dutch government provided the initial financial support. The plan was to conduct the project as a civil society initiative and to draft a charter that articulated the consensus taking form in the emerging global civil society on values and principles for a sustainable future.

Ambassador Mohamed Sahnoun of Algeria served as the first executive director of the Earth Charter project during 1995 as a new international consultation process and research in the fields of environmental ethics, sustainable development, and international law got underway. An Earth Charter secretariat was established at the Earth Council in Costa Rica under the management of the executive director of the Earth Council, Maximo Kalaw of the Philippines. In 1996, Mirian Vilela of Brazil became coordinator of Earth Charter activities at the Earth Council. Toward the end of 1996, an Earth Charter Commission was formed to oversee the drafting process. It was co-chaired by Strong and Gorbachev and included a diverse group of twenty-three eminent persons from all the major regions of the world. The Commission invited Steven C. Rockefeller, a
professor of religion and ethics from the United States, to chair and form an international drafting committee. The drafting process, which began in January 1997, required three years.

Hundreds of organizations and thousands of individuals participated in the creation of the Earth Charter. Forty-five Earth Charter national committees were formed. Earth Charter dialogues were conducted throughout the world and on the Internet, and major regional conferences were held in Asia, Africa, Central and South America, North America, and Europe. The ideas and values in the Earth Charter reflect the influence of a great variety of intellectual sources and social movements. These include the wisdom of the world’s religions and great philosophical traditions and the new scientific worldview being shaped by, among other disciplines, cosmology and ecology. The Earth Charter should be seen as a product of the global ethics movement that inspired the Universal Declaration of Human Rights, and gained wide support in the 1990s. The drafting committee worked closely with the World Conservation Union (IUCN) Commission on Environmental Law and carefully reviewed all relevant international law declarations and treaties and over 200 civil society declarations and people’s treaties. The Earth Charter builds on and extends international environmental and sustainable development law. It reflects the concerns and aspirations expressed at the seven UN Summit meetings held during the 1990s on the environment, human rights, population, children, women, social development, and the cities. It recognizes the importance of the spread of participatory and deliberative democracy for human development and environmental protection.

The final text of the Earth Charter, which was approved at a meeting of the Earth Charter Commission at the UNESCO headquarters in Paris in March 2000, contains a preamble, 16 main principles, sixty-one supporting principles, and a conclusion entitled “The Way Forward.” The Preamble affirms that “we are one human family and one Earth community with a common destiny,” and the Earth Charter encourages all people to recognize their shared responsibility, each according to his or her situation and capacity, for the well-being of the whole human family, the greater community of life, and future generations. Recognizing the interrelationship of humanity’s environmental, economic, social, and cultural problems, the Earth Charter presents an inclusive, integrated ethical framework. The titles of the four sections into which the principles are divided indicate the breadth of the vision: I Respect and Care for the Community of Life; II Ecological Integrity; III Social and Economic Justice; and IV Democracy, Non-Violence, and Peace. The Earth Charter identifies a number of widely shared spiritual attitudes and values that can strengthen commitment to its ethical principles, and the document culminates with a vision of peace and the joyful celebration of life.

II. The Earth Charter Initiative, 2000 – 2005

A second phase in the Earth Charter Initiative was begun with the formal launch of the Earth Charter at the Peace Palace in The Hague in June 2000. Following this event, the Earth Charter Commission turned over responsibility for oversight of the Earth Charter Initiative and fund raising to a newly created Steering Committee, which included among others several members of the Earth Charter Commission. The Commission retained authority over the text of the Earth Charter and its members continued to provide advice and support for the Initiative on an individual basis. In 2000, Mirian Vilela was appointed to serve as the executive director of the Earth Charter Secretariat. Over the next five years the Earth Charter was translated into forty languages and endorsed by over two thousand five hundred organizations representing the interests of hundreds of millions of people. Among the organizations that have endorsed the Earth Charter are UNESCO, the World Conservation Union (IUCN), the International Council of Local Environmental Initiatives (ICLEI), and the US Conference of Mayors. The Earth Charter provides an excellent overview of the essential elements of sustainable development and world peace, and before long it was being widely used as a teaching resource in schools, colleges, universities, and non-formal education programmes.
A major effort was made to secure formal recognition of the Earth Charter at the World Summit on Sustainable Development in Johannesburg in 2002. During the Summit, a number of world leaders and heads of state and many NGOs attending the Summit issued public statements in support of the Earth Charter. The final version of the Johannesburg Declaration does not include an explicit reference to the Earth Charter. However, it does affirm the central theme of the Earth Charter when, borrowing language from the Charter, it states that “we declare our responsibility to one another, to the greater community of life, and to our children.” Efforts to seek formal recognition of the Earth Charter by the United Nations General Assembly are on-going.

By 2005, the Earth Charter had become widely recognized as a global consensus statement on the meaning of sustainability, the challenge and vision of sustainable development, and the principles by which sustainable development is to be achieved. It was being used as a basis for peace negotiations, as a reference document in the development of global standards and codes of ethics, as a resource for governance and legislative processes, as a community development tool, and as a framework for educational programmes on sustainable development. The Charter was also an important influence on the Plan of Implementation for the UN Decade of Education for Sustainable Development and ECI became a partner with UNESCO in promoting the Decade.

In 2005 the Steering Committee undertook a major strategic review of the progress and strengths and weaknesses of the Earth Charter Initiative. This involved both an internal and external assessment. The external review was conducted by Alan AtKisson, an international consultant in the field of sustainable development. AtKisson's lengthy evaluation of the Earth Charter Initiative led him to conclude that much had been accomplished between 2000 and 2005 and that the Initiative had great promise and should be continued, but its future success depended upon a major reorganization of its management structure and long-range strategic planning. The strategic review process culminated with a major Earth Charter conference in The Netherlands that was hosted by the Dutch National Committee on International Cooperation and Sustainable Development (NCDO) and that brought together over 400 Earth Charter leaders and activists. At this conference, the Steering Committee's decision to appoint Alan AtKisson as a new executive director of the Earth Charter Secretariat was announced. AtKisson was given the responsibility of managing a transition to a third phase in the Earth Charter Initiative.

During The Netherlands conference, KIT Publishers in Amsterdam released a book edited by Peter Blaze Corcoran, Mirian Vilela and Alide Roerink entitled The Earth Charter In Action: Toward A Sustainable World. This publication contains sixty essays by Earth Charter leaders and supporters from around the world and provides a valuable overview of the significance of the Earth Charter and of Earth Charter activities.

III. The Earth Charter Initiative, 2006 to the Present

In 2006 the Earth Charter Secretariat was reorganized as Earth Charter International (ECI). A new Earth Charter International Council with twenty three members was formed to replace the Steering Committee and to oversee ECI's core programmes and small staff. Steven Rockefeller, Razeena Omar of South Africa and Erna Witoelar of Indonesia were elected as the co-chairs of the newly formed ECI Council. A new Earth Charter Center for Communications and Strategic Planning was opened in Stockholm, Sweden. The former Earth Charter Secretariat at the University for Peace was transformed into the Earth Charter Center for Education for Sustainable Development. The ECI Council adopted a new mission and vision statement, and began developing the new strategies and policies for the third phase.
National governments began to make even stronger, more formal commitments to the Earth Charter. The Brazilian Ministry of Environment entered into a formal agreement with the ECI secretariat and the Center for the Defense of Human Rights of Petrópolis, founded by Leonardo Boff and Marcia Miranda, to promote the Earth Charter in every sector of Brazilian society. During a presidential celebration of Earth Day 2007, the ministries of education and environment in the Mexican government made public commitments to use the Earth Charter as an educational instrument in the Mexican school system. Other state and city governments initiated or strengthened formal public commitments to adopt, use and implement the Earth Charter, including the State of Queensland, Australia, the Republic of Tatarstan in the Russian Federation, and cities like Calgary (Canada), Munich (Germany), New Dehli (India), Oslo (Norway), and Sao Paulo (Brazil).

During 2006 and 2007, endorsement of the Earth Charter reached 4,800 organizations and the Earth Charter website began to experience a dramatic increase in visitors, growing to nearly 100,000 per month. New Programmes were launched in Religion and Business. The Earth Charter Youth Initiative continued to expand with groups operating in twenty-three countries and and a 12-person youth leadership team elected. The number of Earth Charter affiliates grew to ninety-seven in fifty-eight countries. The Charter began to take on new relevance in matters of policy as the global dimension of problems such as climate change highlighted our interdependencies and the need for collective action. ECI was invited to participate in an international conference on Intercultural and Interreligious Cooperation for Peace organized by the president of the UN General Assembly.

As a result of an intensive three-day workshop on long-range strategic planning lead by Oscar Motomura at Amana Key in Sao Paulo, Brazil, in 2007, the ECI Council launched a new strategy of “Decentralized Empowerment for Scaling Up,” designed to dramatically increase active participation in the Initiative without the need for an expanded central administration. New “Action Guidelines” were released to provide a framework and coordinating mechanism for this decentralized activity to promote the Earth Charter and implement its vision.

After two years managing the transition to the third phase of the Earth Charter Initiative, Alan AtKisson stepped down as executive director of ECI at the end of 2007 in order to devote more time to his consulting business and other related projects. He continues his association with ECI as an advisor. Mirian Vilela was appointed the new executive director of ECI, and the headquarters of the ECI Secretariat was again based at the University for Peace in Costa Rica, together with the Earth Charter Center for Education for Sustainable Development. In 2007 Erna Witoelar stepped down as co-chair and Brendan Mackey was elected as a new co-chair.

Looking to the future, the Earth Charter continues to grow in international stature as a source of inspiration for action, an educational framework, and an international soft-law document, as well as a reference document for the development of policy, legislation, and international standards and agreements. Endorsement of the Earth Charter has become a process that stresses engagement with the document in practice, including use of the Charter as an assessment framework. Decentralized empowerment paves the way for a rapid expansion in Earth Charter-related activity worldwide. In keeping with this approach, the ECI Council, at its May 2008 meeting, adopted a long range strategic plan that involves the creation of six task forces that will initiate new activities in support of the Earth Charter in the areas of Business, Education, the Media, Religion, the United Nations and Youth.
Since the ECI Council is not legally incorporated and, therefore, cannot enter into legal contracts and conduct certain financial transactions, Earth Charter Associates, Ltd. (ECA) was created in the United States in 2006 to provide certain legal, financial, and fund raising services in support of ECI. ECA is being registered in the US as a charitable (501c3) organization.

ECA provides donors with a vehicle for making charitable contributions in support of ECI. For this purpose ECA contracts with Rockefeller Philanthropy Advisors (RPA), a non-profit organization based in New York City that provides financial and philanthropic services to individuals, foundations and other non-profit organizations. RPA has established and operates an Earth Charter Fund, which receives contributions and transmits the funds to the University for Peace in support of the ECI Secretariat or to other Earth Charter projects as appropriate. RPA’s services include the management of funds and bank accounts, provision of accounting services, and financial reporting. RPA also insures that all grants from the Earth Charter Fund conform with US federal law.

ECA is able to enter other legal contracts on behalf of ECI when necessary, and it is currently engaged in securing international trademark registration for the Earth Charter logo and the title “Earth Charter Initiative.”

The activities of ECA are overseen by a board of six trustees, four of whom are ECI Council members. The officers and trustees of ECA are the following:

Rick Clugston
Song Li
Nicholas Robinson, Vice Chair
Steven Rockefeller, Chair
Laurie Rockett, Secretary
Mary Evelyn Tucker
XI. Statements on Controversial Issues

From time to time people raise questions about the position of the Earth Charter regarding various sensitive or controversial social issues. The following statements on several such topics have been prepared by Steven Rockefeller in consultation with various ECI Council members and Advisors. These statements are not official statements adopted by ECI Council. However, the Council supports the use of these statements by Council members, the Secretariat, Affiliates, and others when they are looking for guidance regarding how to respond to questions about the Earth Charter.

The Earth Charter and Religion

The Earth Charter is the product of a decade-long, worldwide, cross-cultural dialogue on common goals and shared values. Consultations on the Earth Charter began during the 1992 Rio Earth Summit, but the actual drafting of the Earth Charter was conducted and completed as a civil society initiative. It is the purpose of the Earth Charter to articulate the consensus on shared values taking form in the emerging global civil society. Many religious leaders from diverse traditions participated in the consultation and drafting process.

The Earth Charter sets forth general ethical principles and strategic guidelines for building a just, sustainable, and peaceful world. The text of the Earth Charter affirms many values that are fundamental to the great religious traditions of humanity, including compassion, love, justice, care for the poor, environmental conservation, and peace.

The Earth Charter promotes the building of a culture of tolerance, nonviolence, and peace. It strongly supports respect for cultural and religious diversity.

The Earth Charter Initiative encourages all cultures and religions to embrace, in their own distinctive ways, the Earth Charter’s ethic of respect and care for all peoples and the greater community of life. It is not the purpose of the Earth Charter Initiative to create a new world religion and the Earth Charter has not been presented as a “mystical revelation” as some have asserted. It is not the intention of the Earth Charter Initiative to replace the high ethical demands of the world’s religions with some new ethical minimalism.

Different traditions and organizations affirm, celebrate, and promote the Earth Charter in many diverse ways. The Earth Charter Commission and International Council welcome a diversity of responses from religious organizations and groups. They do not identify the Earth Charter itself with any one response in particular.

In addition to its ethical principles, the Earth Charter recognizes the importance of the spiritual dimension of life and makes reference to several widely shared spiritual values, including the following: The Preamble emphasizes “that when basic needs have been met, human development is primarily about being more, not having more.” It affirms the values of “reverence for the mystery of being, gratitude for the gift of life, and humility regarding the human place in nature.”
The Earth Charter, which seeks support across all boundaries of faith and culture, does not make reference to God or the Creator, because some religious traditions and many humanists do not use God language. However, some people in the Christian, Jewish, Islamic, and Hindu traditions and various other religious traditions choose to interpret the reference to “reverence for the mystery of being” as a summons to reverence for God. Other individuals and groups will not give this reference a theological interpretation.

The Earth Charter teaches respect for nature and Earth, our planetary home. The Earth Charter does not promote the deification or worship of Earth. The Earth Charter capitalizes Earth because this is the name of the planet. All the planets in our solar system have names. Astronomers, scientists in general, and many others use the names of the planets when referring to them. In addition, the use of the name Earth evokes the image of the planet in space as captured by the photographs of the astronauts. This image of Earth as a relatively small, beautiful, and fragile planet floating in space encourages the attitudes of respect and care.

The Earth Charter recognizes that all nations, peoples, and religions live in an increasingly interdependent world and that many urgent problems can only be managed and resolved through global cooperation. Collaboration and partnership require common goals and values such as those found in the Earth Charter. There is a great need for the leadership and support of the world’s religions in the effort to promote shared values and to build a just, sustainable, and peaceful world community.

Even though the Earth Charter advocates worldwide cooperation and global community, it is not the purpose of the Earth Charter to promote creation of a world government. The Earth Charter does state that “the partnership of government, civil society, and business is essential for effective governance.”

**The Earth Charter, Non-Discrimination and Sexual Orientation**

Principle 12 states: “Uphold the right of all, without discrimination, to a natural and social environment supportive of human dignity, bodily health, and spiritual well-being, with special attention to the rights of indigenous peoples and minorities.”

Principle 12.a states: “Eliminate discrimination in all its forms, such as that based on race, color, sex, sexual orientation, religion, language, and national, ethnic or social origin.”

The Earth Charter in Principle 12.a calls for an end to all forms of discrimination, including discrimination based on sexual orientation, in accordance with international human rights law. It is only in this context that the Earth Charter addresses the issue of homosexuality.

Discrimination involves distinctions, exclusions, and restrictions that deny people their human rights and fundamental freedoms as set forth in international law. Some people suffer discrimination because of their sexual orientation. Article 26 in the international Covenant on Political and Civil Rights is widely recognized among international lawyers to provide a general prohibition against discrimination on the basis of sexual orientation.

Principles 12 and 12.a are an extension and clarification of the concerns and values set forth in a number of preceding principles in the Earth Charter. For example, Principles 1 and 2 call for respect and care for the community of life as a whole. Principle 2 emphasizes the values of understanding, compassion, and love. Principle 3 calls for building just and peaceful societies, and Principle 3.a is the imperative to “ensure that communities at all levels, guarantee human rights and fundamental freedoms and provide everyone an
opportunity to realize his or her full potential.” In this spirit, Principle 9.c calls on all communities to “protect the vulnerable.” Principles 12 and 12.a should be read with these other principles in mind.

Fundamental human rights and freedoms under certain circumstances have to be weighed and balanced against each other. In this regard, international jurisprudence (case law) leaves open the possibility that if religious institutions and other organizations are able to demonstrate that it is “legitimate to do so,” they may restrict the opportunities open to gays and lesbians in their institutions. The ethics of such restrictions are a matter of on-going debate.

The Earth Charter recognizes that “Life often involves tensions between important values. This can mean difficult choices.” The tension between individual freedom and social justice or the practice of non-violence and the prevention of harm or environmental protection and economic development are examples. The Earth Charter does not endeavor to address the many complex problems that may arise when individuals, institutions, and governments endeavor to implement its general principles. From the perspective of the Earth Charter there must be very compelling ethical reasons for permitting any form of discrimination in any institution.

The Earth Charter and Responsible Reproduction

The Earth Charter calls for sustainable patterns of human reproduction and for universal access to healthcare that fosters reproductive health and responsible reproduction. However, the Earth Charter does not address the issue of abortion. It does not take a position for or against abortion.

1. The Scope of the Earth Charter

The Earth Charter is the product of a decade-long, world-wide, cross-cultural dialogue on common goals and shared values. Its purpose is to articulate the consensus on shared values that is taking form in the emerging global civil society.

The Earth Charter sets forth general ethical principles and strategic guidelines for building a just, sustainable and peaceful world. The Earth Charter Commission intended to say in the text of the Earth Charter just what is stated and nothing more.

The Earth Charter Commission and International Council recognize that there will be an on-going debate over how to implement the Earth Charter’s various ethical principles and that different cultures and communities will adopt diverse approaches to achieving the goal of sustainable development. The Earth Charter focuses attention on the critical ethical issues and frames the debate. The Earth Charter does not try to prescribe answers to the many complex questions about what means and mechanisms should be chosen in the effort to realize its goals and values.

However, the Commission and International Council do recognize that the ends actually achieved by an initiative are constituted and shaped by the means adopted and that worthy ends do not justify unprincipled means. All means should be consistent with Earth Charter values.

It is helpful to keep in mind that the Earth Charter is made up of principles, not rules. Rules give instruction on exactly what to do in specific situations. Principles advise us on what to think about when we are trying to decide what to do.
2. Sustainable Patterns of Reproduction

The first principle of the Earth Charter is the imperative to “respect . . . life in all its diversity”, and Principle 1.a states that “every form of life has value regardless of its worth to human beings.”

Principle 7 calls for patterns of human reproduction that are sustainable and “safeguard Earth’s regenerative capacities, human rights, and community well-being.” It should be noted that the Earth Charter does not use the term “population control,” and when referring to patterns of reproduction, it explicitly states that these patterns should be pursued in ways that safeguard human rights. In short, the Earth Charter principles are opposed to coercive methods of regulating population growth.

In accord with the international consensus worked out at the UN summits on population in Cairo (1995) and on women in Beijing (1997), the Earth Charter recognizes that the most effective way to achieve sustainable patterns of human reproduction is to promote gender equality and to empower women in and through “universal access to education, healthcare, and economic opportunity.” These values are affirmed in Principle 11 as a matter of social and economic justice as well as sound sustainable development policy.

3. Reproductive Health

The Cairo and Beijing UN summits also specifically emphasize the critical importance of reproductive healthcare for the achievement of sustainable development. The Earth Charter in Principle 7.e, therefore, states, “Ensure universal access to healthcare that fosters reproductive health and responsible reproduction.”

The Beijing Platform for Action (1997) defines health as “a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity.” (Annex II, IV.C.89) According to the Beijing Platform reproductive health involves well-being “in all matters relating to the reproductive system and to its functions and processes.” Achieving reproductive health means “that people are able to have a satisfying and safe sex life and that they have the capability to reproduce and the freedom to decide if, when and how often to do so.” (Annex II, IV.C.94)

4. Responsible Reproduction

As indicated above, Principle 7 makes clear that “responsible reproduction” involves patterns of reproduction “that safeguard Earth’s regenerative capacities, human rights, and community well-being.” It is the position of the Earth Charter that the goal of responsible reproduction should be achieved through gender equality, the empowerment of women, and universal access to healthcare, and in ways that respect humanity’s fundamental human rights and freedoms.

Within the framework of the Earth Charter’s general principles, different cultures and communities may adopt diverse approaches to the provision of health care that fosters reproductive health and responsible reproduction. The Earth Charter does not enter the discussion and debate on this matter.
XII. Biographical Information on ECI Council Members

[Image of Steven C. Rockefeller]

**Steven C. Rockefeller (United States), Co-Chair**
Room 5600, 30 Rockefeller Plaza  
New York, NY 10112, USA

Steven C. Rockefeller is professor emeritus of religion at Middlebury College, where he taught for 30 years and also served as dean of the College and chair of the religion department. He received his master of divinity degree from Union Theological Seminary in New York City and his PH.D. in the philosophy of religion from Columbia University. He is the author of *John Dewey: Religious Faith and Democratic Humanism* (Columbia, 1991) and the co-editor of two books of essays, *The Christ and the Bodhisattva* (SUNY, 1987) and *Sprit and Nature: Why the Environment is a Religious Issue* (Beacon, 1992). His essays appear in a variety of books and journals. In recent years, much of his research and writing has focused on global ethics, sustainable development, and the interrelation of democracy, ecology, and spirituality.

Over the past twelve years, Professor Rockefeller has played a leading role in the drafting and promotion of the Earth Charter. He chaired the Earth Charter international drafting committee. Following the launch of the Earth Charter in 2000, he was made a member of the Earth Charter Commission. He currently serves as co-chair of the Earth Charter International Council and as chair of Earth Charter Associates, Ltd., which has been set up to provide the ECI Council with financial and legal assistance. His essays on the history, structure, and purpose of the Earth Charter appear in many publications.

Active in the field of philanthropy, Professor Rockefeller has served as a trustee of the Rockefeller Brothers Fund (RBF) for twenty-five years and chaired the Fund’s board of trustees from 1998 to 2006. The RBF is an international foundation with programmes on democratic practice, sustainable development, peace and security, and arts and culture. Over the past decade, Professor Rockefeller has served on of the Asian Cultural Council, the council of the University for Peace in Costa Rica, the Philanthropic Collaborative in New York City, and the Wendell Gilley Museum in Southwest Harbor, Maine. He is a member of the High Level Advisory Panel at UNESCO for the UN Decade of Education for Sustainable Development, and he served as the moderator for the launch of the DESD at the UN Headquarters in New York City in 2005. In 1999, the Demeter Fund, of which he is the president, established the Charlotte Park and Wildlife Refuge in the Champlain Valley of Vermont in the US.

[Image of Razeena Omar]

**Razeena Omar (South Africa), Co-Chair**
Department of Environmental Affairs & Tourism;  
Marine and Coastal Management Branch  
Private Bag X 2, Roggebaai, 8012.  
South Africa

Razeena Omar is a South African citizen who takes a keen interest in monitoring trends,
shifts and debates on environment, conservation and education, including policies and implementation issues, and has been a central player in these fields for a number of years. She holds academic and professional qualifications in the areas of botany, zoology, ecology, conservation and education. Subsequent to working in the area of formal education, she joined the World Wide Fund for Nature South Africa (WWF-SA) and was thereafter appointed as environmental adviser to the previous National Minister of Education, Professor Kader Asmal for four years (1999-2003). Her work in the Ministry of Education included establishing the National Environmental Education Programme (NEEP), which resulted in the environment being recognised as a key issue in all education and training programmes in South Africa. Dr. Omar has also contributed to the professional rigour of environment work through conducting a number of evaluations, including the US-funded Windows on the Wild Programme, and a number of Community-based Conservation and Environmental Education projects. She has presented numerous papers and workshops at provincial, national and international levels, and has produced a number of publications, which have made a significant contribution to the field of the environment.

She has visited and participated in courses in a number of international institutions in Africa, Australia, the USA, the Republic of the Maldives, Denmark, and the UK, amongst others. She has also provided advice and guidance to international organisations such as UNESCO. She has served on a number of decision-making boards and advisory structures and committees to contribute towards managing the environment sustainably. Dr. Omar was the executive director for People and Conservation at South African National Parks (SANParks) and, since June 2008, she has been chief director of integrated coastal management and development for the department of Environmental Affairs and Tourism; Marine and Coastal Management.

Brendan Mackey (Australia), Co-Chair
Australia National University
Bld 48
Canberra ACT 200, Australia

Brendan Mackey has a PhD in tropical forest ecology, and is a professor of environmental science at The Australian National University, Canberra. Brendan's research and teaching is in the areas of global environmental change and biodiversity conservation, including the challenge of conservation planning in extensive intact country where indigenous interests are paramount. He co-chairs the IUCN Ethics Specialist Group within the IUCN Commission on Environmental Law. Brendan has a long-standing commitment to the Earth Charter Initiative. He served on the drafting committee, and participated in numerous regional consultations, including an Australian national forum he convened. Prof. Mackey also served as chair of the Earth Charter education advisory committee during the initiative's second phase. Brendan has written extensively on themes related to environmental science, conservation, and the Earth Charter, in particular, on the significance of ecological integrity to world ethics for sustainability.

Zainab Bangura (Sierra Leone)
Movement for Progress Party (MOP)
P.O. Box 600, Freetown, Sierra Leone

Zainab Bangura is the current foreign minister of Sierra Leone. Previously, she was chief of the Civil Affairs Office for the United Nations Mission in Liberia, a position to which she was named in 2006. Zainab began her career as a professional in the field of insurance.
She was led into civil society work in response to war in her region in the early 1990s. In 1995 she founded the Women Organized for a Morally Enlightened Nation (W.O.M.E.N) at a time when the military, through the National Provisional Ruling Council (NPRC) governed the country. W.O.M.E.N was the first non-partisan women’s political rights organization in the country and played a vital role in the campaign against the military junta. Zainab mobilized thousands of women to confront armed soldiers in pro-democracy street protests.

In 1996 Zainab launched The Campaign for Good Governance (CGG). As coordinator of the largest local NGO in Sierra Leone, Zainab led the organisation in promoting democratic participation, new civil society organisations, human rights, the rule of law, and the political and economic empowerment of women. CGG’s work earned international recognition and Zainab herself was honoured with the 2000 Human Rights Award of the New York-based Lawyers Committee for Human Rights. Zainab Bangura left CGG to establish the Movement for Progress Party (MOP) in January 2002. The party organised a diverse core team of founding members from the local professional class, academia, and grassroots organisations. Zainab was nominated as the party’s presidential candidate and thus the only female candidate. More recently, Zainab has worked as a consultant for the UN High Commission for Refugees and the Open Society Initiative.

Mateo A. Castillo Ceja (Mexico)
Titular de la Unidad Coordinadora de Participación Social y Transparencia
Blvd. Adolfo Ruiz Cortines 4209,
6o. Piso, Ala B
Col. Jardines en la Montaña
Delegación. Tlalpan, México, D.F., C.P.14210

Mateo A. Castillo Ceja is the head of the Coordinating Unity of Social Participation and Transparency in the Ministry of Environment of Mexico. Previously he served as president of the Ecological State Council of Michoacan, Mexico, and, with many others, has instigated processes of social participation in the development of environmental public policies for a sustainable Mexico. He is an altruistic person who takes part in the world humanitarian movement. He is considered a national expert in the implementation of local Agenda 21. He has been a representative of civil society in Mexico in many forums and international summits. Castillo is the main developer in Mexico of the Earth Charter and the founder of the National Secretariat. He was awarded the Citizen Merit Prize in 2003, and in 2004 he received honorary mention in the National Prize for Ecological Merit. In 2005, he was awarded the Maximo Kalaw Award for his work in promoting the Earth Charter in Mexico. Mr. Castillo holds a Master’s degree in quality and competitiveness and is a biochemist in the area of pharmacology.

Rick Clugston (United States)
HSUS
2100 ‘L’ Street NW
Washington DC 20037, USA

Rick Clugston has been a vice-president of The Humane Society of the United States (HSUS) and executive director of the Center for Respect of Life and Environment, an HSUS affiliate, for the past 17 years, directing a variety of initiatives to create a more humane and sustainable future. These include: the Association of University Leaders for a Sustainable Future (1997-2007), the Sustainable
and Theological Education to Meet the Environmental Challenge (1992-1999). He founded and serves as the
director of Earth Charter USA (1997-date).

Dr. Clugston is the publisher and editor of *Earth Ethics*, the deputy editor of *The International Journal of
Sustainability in Higher Education* (MCB University Publications), and serves on the Editorial Board of the
*Journal of Education for Sustainable Development* (Sage Publications). He also serves on the boards of the
Center for Environmental and Sustainability Education (Florida Gulf Coast University); the Bonne Bay
Lighthouse Center (Newfoundland); Wolfe’s Neck Farm Foundation (Maine); and the Forum on Religion and
Ecology (Yale University). He was a cofounder of the Global Higher Education for Sustainability Partnership
and the Higher Education Network for Sustainability and the Environment.

Prior to coming to Washington, Dr. Clugston worked for the University of Minnesota for 11 years, first
as a faculty member in the College of Human Ecology, and later as a strategic planner in Academic Affairs,
Continuing Education and the Office of the President. He was a consultant to the State Department of
Education, the Minnesota Business Partnership, and various colleges and school systems on educational
improvement.

He received his doctorate in higher education from the University of Minnesota (1987), and his masters
in human development from the University of Chicago (1977). As an undergraduate psychology and
biochemistry major at the University of Minnesota (1975), he received the Mayo Foundation Scholarship
for Medicine and Medicine Related Fields. His doctoral thesis was selected as dissertation of the year by the
American Association of University Administrators.

**Marianella Curi (Bolivia)**

Bolfor II, Av. 2 de Agosto y Cuarto Anillo
P.O. Box: 6204
Santa Cruz de la Sierra, Bolivia

*Marienella Curi* is a social psychologist experienced in the design of policies for sustainable
development and of environmental education for sustainable development. Previously she was vice-minister
for natural resources and environment, and undersecretary for the promotion of sustainable development
in the government of Bolivia. She was director of the Bolivian Environmental Defence League, the most
extensive network of non-governmental environmental organizations in that country. In 2004, she began
working with The Nature Conservancy (TNC) in the position of policy specialist on the BOLFOR II Project,
and she represents TNC in Bolivia. She is currently the director of the BOLFOR II Project, which is the
largest sustainable forestry management in Bolivia, with financial support from USAID and The Nature
Conservancy. Ms. Curi initiated the creation of the Bolivian Council on Sustainable Development, and was
engaged in the process of developing, validating, and promoting the Earth Charter in Bolivia for several years.

**Camila Argolo Godinho (Brazil)**

Instituto Diversidade/Diversity Institute
Rua Monte Conselho, 690, apt. 503, Rio Vermelho. 41.940-370
Salvador, Bahia, Brazil

*Camila Argólo Godinho* is a young Brazilian environmentalist. She received her
undergraduate degree in international business and has a post-graduate degree in environmental education. Camila has been working locally, nationally, and internationally with youth and environment since 1999.

As a researcher and youth leader, she coordinated the GEO for Youth Brazil Project, developed in partnership with the NGO Interagir, the Latin American and Caribbean Office of UNEP, the ministers of environment and education of Brazil and the National Youth Secretariat. Since 2002, she has taken part in several international conferences, networks and training programmes, including the UNEP TUNZA Youth Council (2003-2005) and Commission of Sustainable Development Youth Caucus and Education Caucus.

In 2002 she received the Petrobras/Universidade Solidaria Merit Award for an environmental education project that she developed in the community of Mussurunga, a slum in Salvador, Brazil. She has been a member of the Earth Charter Youth Initiative since 2002, and from 2005 to 2007 a member of its Core Group. Camila founded and coordinates an Earth Charter Youth Group in Brazil, now incorporated into the Diversity Institute, where she promotes the Earth Charter among youth and community leaders in poor communities.

Camila currently coordinates projects related to community development in the Diversity Institute. She is also the coordinator of the department of corporate responsibility of the Jorge Amado University and is part of the Expert Team A of the Forest Stewadership Council Plantations Review on “Raising the Bar on Corporate Responsibility”.

**Wakako Hironaka (Japan)**
The Democratic Party of Japan Headquarters
1-11-1 Nagata-cho
Chiyoda-ku
Tokyo 100-0014 - Japan

Wakako Hironaka is a member of Japan’s House of Councilors, elected from Chiba Prefecture in July 2004, and is currently serving her fourth term. She is currently serving as chair of the Research Committee on Economy, Industry and Employment, and as a member of the Committee on Education, Culture and Science in the House of Councilors. She is vice-president of the Democratic Party of Japan. In 1993-94, she was state minister, director-general of Environment Agency in the Hosokawa Cabinet. Ms. Hironaka is also active internationally, as a member of the Earth Charter Commission, GLOBE, and GEA.

Ms. Hironaka received a B.A. in English from Ochanomizu Women’s University and an M.A. in Anthropology from Brandeis University. She has written several books, essays, translations, and critiques on education, culture, society, and women’s issues, including Between Two Cultures: Woman - Her Work and Family (1979), Politics is Unexpectedly Interesting (1989), and translations of Ezra Vogel’s Japan as Number One and Haru Reischauer’s Samurai & Silk (Kinu to Bushi).

**Barbro Holmberg (Sweden)**
Slottet
802 66 Gävle, Sweden

Barbro Holmberg is a recognized Swedish Social Democratic politician. She has served for many years the Ministry of Foreign Affairs. In 1999, she became a political adviser and
got involved with the Ministry's Children Project as a project leader. In 2002, she was appointed as the state secretary for that ministry, and during the period of 2003 to 2006, she served as the minister for asylum and migration. In addition to her involvement with the Ministry for Foreign Affairs, she also served as the secretary of the Committee on the Convention on the Rights of the Child and secretary of the Committee on the Convention on the Rights of the Child. She is the author of several books. The latter one deals with issues of women's rights. Ms. Holmberg has also been the editor of two magazines: Social Politics Magazine and Psychology Magazine, a publication for Swedish psychologists. Currently, Ms. Holmberg works as deputy member of the Board of the Swedish Riksbank (National Bank) and as a county governor in Sweden.

Li Lailai (Peoples Republic of China)
Associate Director
Stockholm Environment Institute
Kräftriket 2B
SE-106 91 Stockholm, Sweden

Lailai Li received her bachelor's degree in English, and a master's and a doctorate in sociology from the University of Pittsburgh in the United States. Prior to her appointment as associate director of the Stockholm Environment Institute, Li Lailai served as the national programme director of LEAD-China. Previous to that she worked as a research fellow at the Institute of Sociology and Anthropology at Pekin University, where her research was focused on the interactions between Chinese traditional values, agricultural activities, and environmental impacts. She also served as director of information resources at LEAD International (part time) from 1997 to 2001. She participated in the development of LEAD's information strategy, thereby fulfilling her interest in exploring the role of information and information technology in the human endeavor toward the greater sustainability of society. Her research experiences lie in NGO development and exploration of alternative development paths toward global sustainability.

Song Li (Peoples Republic of China /United States)
World Bank
Washington, DC USA

Song Li is a consultant to the World Bank. Her main responsibilities include managing the environmental projects portfolio in the African region, with particular focus on energy efficiency, renewable energy, climate change adaptation, land degradation, and biosafety. She is part of the team to advise on project preparation and results monitoring use of different World Bank and GEF financial instruments.

From 1996 to 2004, Song Li served as senior environment specialist with the Global Environment Facility (GEF). Her major tasks included managing capacity building projects for countries to implement the UN Framework Convention on Climate Change, Convention on Biological Diversity, and Desertification Convention and responsible for policy and institutional issues, including technical assistance to governments to improve their coordination with local communities, the private sector, and NGOs. She was the GEF focal point for the UN Commission on Sustainable Development.

Previously, Song Li served as Senior Programme Officer for the Secretariat of the Convention on Biological Diversity (CBD), UNEP, responsible for the financial mechanism and funding policy and programme
priorities; and as director for the division of environmental law, Treaty and Law Department, Ministry of Foreign Affairs, People's Republic of China. She represented China at negotiations for global environmental conventions and at the Rio Conference on Environment and Development in 1992.

Song Li holds an L.LM with a focus on Environmental Law from George Washington University, a Certificate in public international law from the Institute of Diplomacy of China, and a Masters in French literature from University Paris III.

**Alexander Likhotal (Russia / Switzerland)**

Green Cross International
160a, route de Florissant
1231 Conches Geneva, Switzerland

Alexander Likhotal is currently president of Green Cross International. He received his Ph.D in Political Science in 1972 from the Institute of International Affairs in Moscow, the subject of his thesis being “The Shaping of the British Security Policy”. He started his academic career as a lecturer at the Moscow State Institute of International Affairs, where he became senior research fellow at the Diplomatic Academy of the Ministry of Foreign Affairs in the USSR. In 1988 he became professor of political science and international relations at the Diplomatic Academy, and in the same year was appointed vice-rector.

During the wake of Gorbachev’s perestroika, being already a well known expert in the field of European security, he received a proposal to become the chief analyst of NATO politics in the International Department of the Central Committee of the CPSU - one of the Soviet foreign policy co-ordination bodies. In 1991 Alexander Likhotal was appointed deputy spokesman and adviser to the president of the USSR. Since then he has been an advisor to Mr Gorbachev, founder of Green Cross, for many years.

**Elizabeth May (Canada)**

Green Party - Central Nova Office
121 George Street
New Glasgow B2H 2K7, Canada

Elizabeth May is an environmentalist, writer, activist, and lawyer. She is the elected leader of the Green Party of Canada since 2006. Prior to that, she served as executive director of the Sierra Club of Canada since 1989. She is a former member of the Board of the International Institute of Sustainable Development and is former vice-chair of the National Round Table on the Environment and the Economy. In 1999, Dalhousie University created a permanent chair in her honour, the Elizabeth May Chair in Women's Health & the Environment. She has received numerous awards, including the United Nations Global 500 award and two honorary doctorates. She is the author of four books. In 2005 Elizabeth May was honoured to be appointed as an Officer to the Order of Canada.

**Oscar Motomura (Brazil)**

Amana-Key
Av. Nova Petrópolis, 33
06709-125 Cotia/São Paulo, Brazil
Oscar Motomura is the founder and chief executive officer of the Amana-Key Group, a center for excellence in management, a network of associates with global reach, based in São Paulo, Brazil. The purpose of Amana-Key is to serve as a world reference for radical innovation in management that is capable of generating the genuine development of people, organizations, communities, and the greater whole. The Amana-Key Group has adopted the Earth Charter as a reference for its education programmes and innovation retreats. Thousands of leaders from corporations and the government take Amana-Key programmes every year, where their awareness of global issues affecting humanity is expanded along with their understanding of the importance of contributing to our collective evolution, through ethical and conscious management practices. Mr. Motomura started his career in Brazil in a large, multinational financial institution, where he reached a senior management position at the age of 26. He founded his own company at 28, which was the starting point for what is now Amana-Key. Motomura is known in Brazil as one the most creative specialists in the area of strategy. He holds degrees in business administration and social psychology.

Dumisani Nyoni (Zimbabwe)
Zimele Institute
Organisation of Rural Associations for Progress (ORAP)
Bulawayo, Zimbabwe

Dumisani Nyoni (also “Dumi”) Nyoni is a graduate of Psychology from Cambridge College, in the United States, and works on the coordinating team of Pioneers of Change, a global network of young leaders, activists, social entrepreneurs and change agents interested in understanding and having an impact on the systems that affect the communities, institutions, and societies around them.

Dumisani is a youth activist, leader, motivator and consultant with a range of experiences from building and coordinating global action networks, facilitating large and small gatherings, workshops and conferences, to advising organizations on strategic development, team building and the inclusion and participation of youth in programmes and processes. Having previously worked with the Earth Council at its former headquarters in Costa Rica, Dumisani helped to launch the youth component of the international Earth Charter Initiative for which he continues to act as an advisor. Dumisani has also worked as a youth coordinator at the Youth Employment Summit (YES) Campaign, where he helped to organize the first global summit on Youth Employment, and to establish YES Country Networks in over 70 countries, which are youth-led multi-stakeholder coalitions that are launching projects around the world to create sustainable livelihoods for youth.

Dumisani serves as an advisor and board member to innovative organizations globally such as TakingITGlobal, EnVision Leadership, EcoVentures International, the Global Youth ACTION Network, The Sweet Mother Tour, IDEAS, and the Zimele Institute at the Organization of Rural Associations for Progress (ORAP) in Zimbabwe. He is also a writer and a keen musician.

Henriette Rasmussen (Greenland)
Henriette Rasmussen
postbox 1029
3900 Nuuk
Kalaallit Nunaat, Greenland

Henriette Rasmussen is managing director of Greenland Publishers in Nuuk, Greenland. She
was a member of the Greenland Home Rule Parliament for eleven years, serving for four years as a member of the Cabinet with the responsibility for Social Affairs and Labor. She was a delegate to the World Conference on Human Rights in Vienna in 1993, where her idea to find a permanent forum for indigenous peoples under the United Nations system was widely recognized by representatives of both states and indigenous peoples; she was also a delegate to the UN Social Summit in Copenhagen in 1994. Ms. Rasmussen served for many years as Chief Technical Advisor in the International Labour Office on Indigenous and Tribal Peoples, in Geneva and is a former Council member of IUCN – The World Conservation Union. She is an educator and journalist.

**Alide Roerink (The Netherlands)**

P.O. Box 94020
1090 GA Amsterdam
The Netherlands

Alide Roerink is an anthropologist and has been involved over the years in networking, advocacy, and policy development for gender justice, international solidarity, and global governance. Alide Roerink was coordinator of Vrouwenberaad Ontwikkelingssamenwerking, a network of gender experts in development agencies in The Netherlands. Since 2000 she has been working with the National Committee for International Cooperation and Sustainable Development (NCDO) in the capacity of advisor international relations, and is a member of the NCDO management team. Alide coordinates the NCDO Earth Charter programme and the Round Table of Worldconnectors for People and the Planet (www.worldconnectors.nl). Alide Roerink is board member of the Alliance for the University for Peace, NVVN (United Nations Associations Netherlands) and SIGN (Schoolfeeding Initiative Ghana Netherlands). NCDO is Affiliated to the Earth Charter Initiative and cooperated with the Earth Charter Initiative in the launch of the Earth Charter in 2000 in the Peace Palace in The Hague and in the Earth Charter+5 event in 2005 in Amsterdam. Alide Roerink initiated and co-edited the book Earth Charter in Action: Towards a Sustainable World. Alide Roerink was advisor to the Earth Charter Initiative before she joined the Council.

**Mohamed Sahnoun (Algeria)**

University for Peace Geneva Office
7-9 chemin de Balexert,
1219 Châtelaine
Geneva, Switzerland

Ambassador Mohamed Sahnoun was, for many years, special adviser to the secretary general of the United Nations Kofi Annan, on the Horn of Africa region. Mr. Sahnoun has had a distinguished diplomatic career serving as adviser to the president of Algeria on diplomatic affairs, deputy secretary-general of the Organization of African Unity (OAU), and deputy secretary-general of the League of Arab States in charge of the Arab-Africa dialogue. He has served as Algeria’s ambassador to the United States, France, Germany, and Morocco, as well as to the United Nations (UN).

Previously, he served as special adviser to the director general of the United Nations Scientific and Cultural Organization (UNESCO) for the Culture of Peace Programme, special envoy of the secretary-general on the Ethiopian/Eritrean conflict (1998-1999), joint representative of the UN and the OAU in the Great Lakes region (1997), special representative of the UN secretary general to Somalia (1992). He was a member of the
World Commission on Environment and Development (the Brundtland Commission) in the 1980s, as well as senior adviser to the Secretary General of the United Nations Conference on Environment and Development in 1992. He was also the first executive director of the Earth Charter Initiative back in 1994. Mr. Sahnoun studied first at the Sorbonne University, in Paris, and than at New York University, where he received his B.A. and M. A. degrees in political science.

Kartikeya Sarabhai (India)
Centre for Environment Education (CEE)
Thaltej Tekra
380 054 Ahmedabad, India

Kartikeya V. Sarabhai is the founder and director of the Centre for Environment Education (CEE), a national institution engaged in promoting environmental awareness and conservation as well as education for sustainable development. Starting small in Ahmedabad in 1984, CEE today works at the national and international level with a staff of over 200 professionals and 40 offices across India, as well as in Australia and Sri Lanka. In 2005, CEE received the Global award for Outstanding Service to Environmental Education from the North American Association for Environmental Education (NAAEE). Mr. Sarabhai also set up VIKSAT, an NGO working towards people’s participation in natural resource management, as well as Sundervan, a nature discovery centre.

Mr. Sarabhai has served on several committees of the Ministry of Environment and Forests and the Ministry of Human Resource Development, Government of India. These include greening India’s formal education system and initiatives for biodiversity education. Mr. Sarabhai has long been associated with IUCN, and was the chair of South and South-East Asia, IUCN Commission on Education and Communication. He is currently vice-chair of the Indian National Commission. Mr. Sarabhai was instrumental in initiating SASEANEE, the South and Southeast Asian Network for Environment Education. He was a member of the Indian delegation to UNCED at Rio and WSSD at Johannesburg and was co-author of India’s report for UNCED. He has been closely associated with communication initiatives of UNEP, especially those connected with Ozone. Under his leadership CEE organized the first International Conference of the Decade of Education for Sustainable Development in January 2005. Mr. Sarabhai received the Tree of Learning Award from The World Conservation Union in 1998 in appreciation of his contributions to the field of environmental education and communication. In 2005, The Indian Institute of Human Rights presented Mr. Sarabhai with the World Human Rights Promotion Award.

Tommy Short (United States)
Chairman and Co-Founder
Earth Council Alliance
1220 Rosecrans St., #418
San Diego, CA 92106 USA

Tommy Short is chairman of Earth Council Alliance, a non-profit organization dedicated to fostering a sustainable global society based on the principles of the Earth Charter. He is an international business man and philanthropist who has long supported sustainability projects around the world. In the past two decades, he has travelled extensively in the Americas, Europe, Africa, and Asia, working with local communities and organizations to identify and fund projects that support the environment, youth, and the arts. As co-founder and chairman of
the Earth Council Alliance, Mr. Short has taken further strides in identifying opportunities and communicating sustainability to numerous organizations with co-founder, Maurice Strong.

**Mary Evelyn Tucker (United States)**
Yale University  
School of Forestry and Environmental Studies  
205 Prospect Street  
New Haven CT 06511 - USA

Mary Evelyn Tucker received her PhD from Columbia University in East Asian religions. She was named to a dual appointment with the Yale Divinity School and the Yale School of Forestry and Environmental Studies. Previously she was a visiting professor of religion at Yale University, and she is founder and coordinator of the Forum on Religion and Ecology. Along with John Grim, she organized a ten-conference series on World Religions and Ecology at Harvard’s Center for the Study of World Religions, which led to the publication of 10 volumes by Harvard from this series. She co-edited the volumes on the ecological dimensions of Confucianism, Buddhism, and Hinduism. They are also editors of a series of 18 books on Ecology and Justice from Orbis Books. Tucker has been a committee member of the Interfaith Partnership for the Environment at the United Nations Environment Programme (UNEP) since 1986, and is vice president of the American Teilhard Association. She was a member of the Earth Charter International Drafting Committee.

She has published *Worldly Wonder: Religions Enter Their Ecological Phase* (Open Court Press, 2003) and edited two volumes on Confucian Spirituality with Tu Weiming. Her newest books are an edited volume of Thomas Berry's papers titled *Evening Thoughts: Reflecting of the Earth as Sacred Community* (Sierra Club Books and University of California Press, 2006), and *The Record of Great Doubts: The Philosophy of Ch'i* (Columbia University Press, 2007).

**Mirian Vilela (Brazil)**
Earth Charter International Secretariat  
c/o University for Peace  
P.O. Box 138-6100 El Rodeo de Mora  
Ciudad Colón, Costa Rica

Mirian Vilela is the executive director of Earth Charter International and has been involved in the initiative internationally since early 1996. She has coordinated an international process of consultation, and set up partnerships with organizations and individuals who contributed to the consultation process and who continue to be involved in the implementation phase of the Charter. She has organized and facilitated numerous international workshops and seminars on values and principles for sustainability. Prior to her work with the Earth Charter, Ms. Vilela worked for the United Nations Conference on Environment and Development (UNCED) for two years in preparation of the 1992 UN Earth Summit. She is currently a faculty member of the University for Peace. She holds a master's degree in public administration from the Harvard Kennedy School of Government, where she was an Edward Mason Fellow.
Erna Witoelar (Indonesia)
United Nations
Jl. M.H. Thamrin kav.3
P.O. Box 2338 - Jakarta 10001, Indonesia

Erna Witoelar was appointed as UN Special Ambassador for MDGs in Asia & the Pacific in October 2003. She is the former minister of human settlements and regional development (1999-2001) and a former member of the National Assembly of Indonesia. She currently serves as chairperson of the Indonesia Biodiversity Foundation (KEHATI), co-chair of the Partnership for Governance Reform in Indonesia, and an Earth Charter Commissioner. Before joining the Indonesian government, she pursued a long career in civil society and led the Indonesian Consumer Foundation (YLKI), founded and led both the Indonesia Forum for the Environment (WALHI) and Friends of the Environment Fund (DML), among others. At the global level she has been elected president of Consumers International (1991-1997), member of the Commission on Developing Countries and Global Changes (1990-1992), and member of the Advisory Committee on Industry and Sustainable Development of the Brundlandt Commission (1985-1986). She is currently the board member of several civil society organizations at national and international levels, including chairing the YIPD (Foundation for Local Governance Innovation), and serves as an advisor to both the Indonesian Association of Municipalities and Association of Districts. She was a recipient of the UNEP Global 500 Award during the Rio Summit in 1992, the Earth Day International Award at the UN in 1993, and the Indonesian Presidential Medal for the Environment in 1995.

PREAMBLE

We stand at a critical moment in Earth’s history, a time when humanity must choose its future. As the world becomes increasingly interdependent and fragile, the future at once holds great peril and great promise. To move forward we must recognize that in the midst of a magnificent diversity of cultures and life forms we are one human family and one Earth community with a common destiny. We must join together to bring forth a sustainable global society founded on respect for nature, universal human rights, economic justice, and a culture of peace. Towards this end, it is imperative that we, the peoples of Earth, declare our responsibility to one another, to the greater community of life, and to future generations.

Earth, Our Home

Humanity is part of a vast evolving universe. Earth, our home, is alive with a unique community of life. The forces of nature make existence a demanding and uncertain adventure, but Earth has provided the conditions essential to life’s evolution. The resilience of the community of life and the well-being of humanity depend upon preserving a healthy biosphere with all its ecological systems, a rich variety of plants and animals, fertile soils, pure waters, and clean air. The global environment with its finite resources is a common concern of all peoples. The protection of Earth’s vitality, diversity, and beauty is a sacred trust.

The Global Situation

The dominant patterns of production and consumption are causing environmental devastation, the depletion of resources, and a massive extinction of species. Communities are being undermined. The benefits of development are not shared equitably and the gap between rich and poor is widening. Injustice, poverty, ignorance, and violent conflict are widespread and the cause of great suffering. An unprecedented rise in human population has overburdened ecological and social systems. The foundations of global security are threatened. These trends are perilous—but not inevitable.

The Challenges Ahead

The choice is ours: form a global partnership to care for Earth and one another or risk the destruction of ourselves and the diversity of life. Fundamental changes are needed in our values, institutions, and ways of living. We must realize that when basic needs have been met, human development is primarily about being more, not having more. We have the knowledge and technology to provide for all and to reduce our impacts on the environment. The emergence of a global civil society is creating new opportunities to build a democratic and humane world. Our environmental, economic, political, social, and spiritual challenges are interconnected, and together we can forge inclusive solutions.
Universal Responsibility

To realize these aspirations, we must decide to live with a sense of universal responsibility, identifying ourselves with the whole Earth community as well as our local communities. We are at once citizens of different nations and of one world in which the local and global are linked. Everyone shares responsibility for the present and future well-being of the human family and the larger living world. The spirit of human solidarity and kinship with all life is strengthened when we live with reverence for the mystery of being, gratitude for the gift of life, and humility regarding the human place in nature.

We urgently need a shared vision of basic values to provide an ethical foundation for the emerging world community. Therefore, together in hope we affirm the following interdependent principles for a sustainable way of life as a common standard by which the conduct of all individuals, organizations, businesses, governments, and transnational institutions is to be guided and assessed.

PRINCIPLES

I. RESPECT AND CARE FOR THE COMMUNITY OF LIFE

1. Respect Earth and life in all its diversity.
   a. Recognize that all beings are interdependent and every form of life has value regardless of its worth to human beings.
   b. Affirm faith in the inherent dignity of all human beings and in the intellectual, artistic, ethical, and spiritual potential of humanity.

2. Care for the community of life with understanding, compassion, and love.
   a. Accept that with the right to own, manage, and use natural resources comes the duty to prevent environmental harm and to protect the rights of people.
   b. Affirm that with increased freedom, knowledge, and power comes increased responsibility to promote the common good.

3. Build democratic societies that are just, participatory, sustainable, and peaceful.
   a. Ensure that communities at all levels guarantee human rights and fundamental freedoms and provide everyone an opportunity to realize his or her full potential.
   b. Promote social and economic justice, enabling all to achieve a secure and meaningful livelihood that is ecologically responsible.

   a. Recognize that the freedom of action of each generation is qualified by the needs of future generations.
   b. Transmit to future generations values, traditions, and institutions that support the long-term flourishing of Earth's human and ecological communities.

In order to fulfill these four broad commitments, it is necessary to:
II. ECOLOGICAL INTEGRITY

5. Protect and restore the integrity of Earth's ecological systems, with special concern for biological diversity and the natural processes that sustain life.
   a. Adopt at all levels sustainable development plans and regulations that make environmental conservation and rehabilitation integral to all development initiatives.
   b. Establish and safeguard viable nature and biosphere reserves, including wild lands and marine areas, to protect Earth's life support systems, maintain biodiversity, and preserve our natural heritage.
   c. Promote the recovery of endangered species and ecosystems.
   d. Control and eradicate non-native or genetically modified organisms harmful to native species and the environment, and prevent introduction of such harmful organisms.
   e. Manage the use of renewable resources such as water, soil, forest products, and marine life in ways that do not exceed rates of regeneration and that protect the health of ecosystems.
   f. Manage the extraction and use of non-renewable resources such as minerals and fossil fuels in ways that minimize depletion and cause no serious environmental damage.

6. Prevent harm as the best method of environmental protection and, when knowledge is limited, apply a precautionary approach.
   a. Take action to avoid the possibility of serious or irreversible environmental harm even when scientific knowledge is incomplete or inconclusive.
   b. Place the burden of proof on those who argue that a proposed activity will not cause significant harm, and make the responsible parties liable for environmental harm.
   c. Ensure that decision making addresses the cumulative, long-term, indirect, long distance, and global consequences of human activities.
   d. Prevent pollution of any part of the environment and allow no build-up of radioactive, toxic, or other hazardous substances.
   e. Avoid military activities damaging to the environment.

7. Adopt patterns of production, consumption, and reproduction that safeguard Earth's regenerative capacities, human rights, and community well-being.
   a. Reduce, reuse, and recycle the materials used in production and consumption systems, and ensure that residual waste can be assimilated by ecological systems.
   b. Act with restraint and efficiency when using energy, and rely increasingly on renewable energy sources such as solar and wind.
   c. Promote the development, adoption, and equitable transfer of environmentally sound technologies.
   d. Internalize the full environmental and social costs of goods and services in the selling price, and enable consumers to identify products that meet the highest social and environmental standards.
   e. Ensure universal access to health care that fosters reproductive health and responsible reproduction.
   f. Adopt lifestyles that emphasize the quality of life and material sufficiency in a finite world.
8. **Advance the study of ecological sustainability and promote the open exchange and wide application of the knowledge acquired.**
   
a. Support international scientific and technical cooperation on sustainability, with special attention to the needs of developing nations.

b. Recognize and preserve the traditional knowledge and spiritual wisdom in all cultures that contribute to environmental protection and human well-being.

c. Ensure that information of vital importance to human health and environmental protection, including genetic information, remains available in the public domain.

III. **SOCIAL AND ECONOMIC JUSTICE**

9. **Eradicate poverty as an ethical, social, and environmental imperative.**
   
a. Guarantee the right to potable water, clean air, food security, uncontaminated soil, shelter, and safe sanitation, allocating the national and international resources required.

b. Empower every human being with the education and resources to secure a sustainable livelihood, and provide social security and safety nets for those who are unable to support themselves.

c. Recognize the ignored, protect the vulnerable, serve those who suffer, and enable them to develop their capacities and to pursue their aspirations.

10. **Ensure that economic activities and institutions at all levels promote human development in an equitable and sustainable manner.**
   
a. Promote the equitable distribution of wealth within nations and among nations.

b. Enhance the intellectual, financial, technical, and social resources of developing nations, and relieve them of onerous international debt.

   c. Ensure that all trade supports sustainable resource use, environmental protection, and progressive labor standards.

   d. Require multinational corporations and international financial organizations to act transparently in the public good, and hold them accountable for the consequences of their activities.

11. **Affirm gender equality and equity as prerequisites to sustainable development and ensure universal access to education, health care, and economic opportunity.**
   
a. Secure the human rights of women and girls and end all violence against them.

b. Promote the active participation of women in all aspects of economic, political, civil, social, and cultural life as full and equal partners, decision makers, leaders, and beneficiaries.

   c. Strengthen families and ensure the safety and loving nurture of all family members.

12. **Uphold the right of all, without discrimination, to a natural and social environment supportive of human dignity, bodily health, and spiritual well-being, with special attention to the rights of indigenous peoples and minorities.**
a. Eliminate discrimination in all its forms, such as that based on race, color, sex, sexual orientation, 
   religion, language, and national, ethnic or social origin.

b. Affirm the right of indigenous peoples to their spirituality, knowledge, lands and resources and to their 
   related practice of sustainable livelihoods.

c. Honor and support the young people of our communities, enabling them to fulfill their essential role 
   in creating sustainable societies.

d. Protect and restore outstanding places of cultural and spiritual significance.

IV. DEMOCRACY, NONVIOLENCE, AND PEACE

13. Strengthen democratic institutions at all levels, and provide transparency and accountability in 
governance, inclusive participation in decision making, and access to justice.

   a. Uphold the right of everyone to receive clear and timely information on environmental matters and all 
development plans and activities which are likely to affect them or in which they have an interest.

   b. Support local, regional and global civil society, and promote the meaningful participation of all 
interested individuals and organizations in decision making.

   c. Protect the rights to freedom of opinion, expression, peaceful assembly, association, and dissent.

   d. Institute effective and efficient access to administrative and independent judicial procedures, including 
remedies and redress for environmental harm and the threat of such harm.

   e. Eliminate corruption in all public and private institutions.

   f. Strengthen local communities, enabling them to care for their environments, and assign environmental 
responsibilities to the levels of government where they can be carried out most effectively.

14. Integrate into formal education and life-long learning the knowledge, values, and skills needed for a 
sustainable way of life.

   a. Provide all, especially children and youth, with educational opportunities that empower them to 
contribute actively to sustainable development.

   b. Promote the contribution of the arts and humanities as well as the sciences in sustainability education.

   c. Enhance the role of the mass media in raising awareness of ecological and social challenges.

   d. Recognize the importance of moral and spiritual education for sustainable living.

15. Treat all living beings with respect and consideration.

   a. Prevent cruelty to animals kept in human societies and protect them from suffering.

   b. Protect wild animals from methods of hunting, trapping, and fishing that cause extreme, 
prolonged, or avoidable suffering.

   c. Avoid or eliminate to the full extent possible the taking or destruction of non-targeted species.
16. Promote a culture of tolerance, nonviolence, and peace.

a. Encourage and support mutual understanding, solidarity, and cooperation among all peoples and within and among nations.

b. Implement comprehensive strategies to prevent violent conflict and use collaborative problem solving to manage and resolve environmental conflicts and other disputes.

c. Demilitarize national security systems to the level of a non-provocative defense posture, and convert military resources to peaceful purposes, including ecological restoration.

d. Eliminate nuclear, biological, and toxic weapons and other weapons of mass destruction.

e. Ensure that the use of orbital and outer space supports environmental protection and peace.

f. Recognize that peace is the wholeness created by right relationships with oneself, other persons, other cultures, other life, Earth, and the larger whole of which all are a part.

THE WAY FORWARD

As never before in history, common destiny beckons us to seek a new beginning. Such renewal is the promise of these Earth Charter principles. To fulfill this promise, we must commit ourselves to adopt and promote the values and objectives of the Charter.

This requires a change of mind and heart. It requires a new sense of global interdependence and universal responsibility. We must imaginatively develop and apply the vision of a sustainable way of life locally, nationally, regionally, and globally. Our cultural diversity is a precious heritage and different cultures will find their own distinctive ways to realize the vision. We must deepen and expand the global dialogue that generated the Earth Charter, for we have much to learn from the ongoing collaborative search for truth and wisdom.

Life often involves tensions between important values. This can mean difficult choices. However, we must find ways to harmonize diversity with unity, the exercise of freedom with the common good, short-term objectives with long-term goals. Every individual, family, organization, and community has a vital role to play. The arts, sciences, religions, educational institutions, media, businesses, nongovernmental organizations, and governments are all called to offer creative leadership. The partnership of government, civil society, and business is essential for effective governance.

In order to build a sustainable global community, the nations of the world must renew their commitment to the United Nations, fulfill their obligations under existing international agreements, and support the implementation of Earth Charter principles with an international legally binding instrument on environment and development.

Let ours be a time remembered for the awakening of a new reverence for life, the firm resolve to achieve sustainability, the quickening of the struggle for justice and peace, and the joyful celebration of life.
Let ours be a time remembered for the awakening of a new reverence for life, the firm resolve to achieve sustainability, the quickening of the struggle for justice and peace, and the joyful celebration of life.

*The Earth Charter*
